PART 1. FOUNDATIONS

ONE Introduction and Motivation 1

TWO Notation and Basic Operations 3

THREE Matrix Properties, Fundamental Spaces, Orthogonality 12
- *3.1 Vector Spaces* 12
- *3.2 Matrix Rank* 18
- *3.3 Fundamental Spaces Associated with* $\mathbf{A} \in \mathbb{R}^{M \times N}$ 23
- *3.4 Gram-Schmidt Orthogonalization* 41
- *3.5 Summary* 45

FOUR Introduction to Eigenanalysis 47
- *4.1 Preface* 47
- *4.2 Eigenanalysis Introduced* 48
- *4.3 Eigenanalysis as Spectral Representation* 57
- *4.4 Summary* 73

FIVE The Algebraic Operation of SVD 75
- *5.1 SVD Introduced* 75
- *5.2 Some Examples* 80
- *5.3 SVD Applications* 86
- *5.4 Summary* 90

PART 2. METHODS OF DATA ANALYSIS

SIX The Gray World of Practical Data Analysis: An Introduction to Part 2 95

SEVEN Statistics in Deterministic Sciences: An Introduction 96
- *7.1 Probability Distributions* 99
- *7.2 Degrees of Freedom* 104

EIGHT Autocorrelation 109
- *8.1 Theoretical Autocovariance and Autocorrelation Functions of AR(1) and AR(2)* 118

Copyrighted Material

8.2 Acf-derived Timescale 123
8.3 Summary of Chapters 7 and 8 125

NINE Regression and Least Squares 126
9.1 Prologue 126
9.2 Setting Up the Problem 126
9.3 The Linear System $\mathbf{Ax} = \mathbf{b}$ 130
9.4 Least Squares: The SVD View 144
9.5 Some Special Problems Giving Rise to Linear Systems 149
9.6 Statistical Issues in Regression Analysis 165
9.7 Multidimensional Regression and Linear Model Identification 185
9.8 Summary 195

TEN. THE FUNDAMENTAL THEOREM OF LINEAR ALGEBRA 197
10.1 Introduction 197
10.2 The Forward Problem 197
10.3 The Inverse Problem 198

ELEVEN. EMPIRICAL ORTHOGONAL FUNCTIONS 200
11.1 Introduction 200
11.2 Data Matrix Structure Convention 201
11.3 Reshaping Multidimensional Data Sets for EOF Analysis 201
11.4 Forming Anomalies and Removing Time Mean 204
11.5 Missing Values, Take 1 205
11.6 Choosing and Interpreting the Covariability Matrix 208
11.7 Calculating the EOFs 218
11.8 Missing Values, Take 2 225
11.9 Projection Time Series, the Principal Components 228
11.10 A Final Realistic and Slightly Elaborate Example: Southern New York State Land Surface Temperature 234
11.11 Extended EOF Analysis, EEOF 244
11.12 Summary 260

TWELVE. THE SVD ANALYSIS OF TWO FIELDS 261
12.1 A Synthetic Example 265
12.2 A Second Synthetic Example 268
12.3 A Real Data Example 271
12.4 EOFs as a Prefilter to SVD 273
12.5 Summary 274

THIRTEEN. SUGGESTED HOMEWORK 276
13.1 Homework 1, Corresponding to Chapter 3 276
13.2 Homework 2, Corresponding to Chapter 3 283
13.3 Homework 3, Corresponding to Chapter 3 290
13.4 Homework 4, Corresponding to Chapter 4 292

Copyrighted Material

13.5 Homework 5, Corresponding to Chapter 5 296
13.6 Homework 6, Corresponding to Chapter 8 300
13.7 A Suggested Midterm Exam 303
13.8 A Suggested Final Exam 311

Index 313
