The Mushroom at the End of the World
On the Possibility of Life in Capitalist Ruins
Anna Lowenhaupt Tsing

“If we must survive in the ‘ruins of capitalism’—what some call the Anthropocene—we need an example of how totally unexpected connections can be made between the economy, culture, biology, and survival strategies. In this book, Anna Lowenhaupt Tsing offers a marvelous example with the unlikely case of a globalized mushroom.”
—Bruno Latour, author of An Inquiry into Modes of Existence

Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made?

A tale of diversity within our damaged landscapes, The Mushroom at the End of the World follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction.

By investigating one of the world’s most sought-after fungi, The Mushroom at the End of the World presents an original examination into the relation between capitalist destruction and collaborative survival within multispecies landscapes, the prerequisite for continuing life on earth.

Religious Difference in a Secular Age
A Minority Report
Saba Mahmood

“In this stunning book, Mahmood calls into question a good deal of the received wisdom about secularism and the divisions between East and West. Religious Difference in a Secular Age is original, pathbreaking, and important.”
—Joan Wallach Scott, author of The Politics of the Veil

The plight of religious minorities in the Middle East is often attributed to the failure of secularism to take root in the region. Religious Difference in a Secular Age challenges this assessment by examining four cornerstones of secularism—political and civil equality, minority rights, religious freedom, and the legal separation of private and public domains.

A provocative work of scholarship, Religious Difference in a Secular Age challenges us to rethink the promise and limits of the secular ideal of religious equality.

Ethical Life
Its Natural and Social Histories
Webb Keane

“With Ethical Life, Webb Keane confirms his place as one of anthropology’s most gifted thinkers. The scope of this book is phenomenal, ranging over a host of disciplines and debates with erudition. Ethical Life provides a new model for what bold anthropology can achieve, bringing us back to the difficult question of how to understand the natural and social histories of humankind—a question that many of us have simply been too timid to ask.”
—Matthew Engelke, London School of Economics

The human propensity to take an ethical stance toward oneself and others is found in every known society, yet we also know that values taken for granted in one society can contradict those in another. Does ethical life arise from human nature itself? Is it a universal human trait? Or is it a product of one’s cultural and historical context? Webb Keane offers a new approach to the empirical study of ethical life that reconciles these questions, showing how ethics arise at the intersection of human biology and social dynamics.

This series presents innovative work that extends classic ethnographic methods and questions into areas of pressing interest in technology and economics. It explores the varied ways new technologies combine with older technologies and cultural understandings to shape novel forms of subjectivity, embodiment, knowledge, place, and community. By doing so, the series demonstrates the relevance of anthropological inquiry to emerging forms of digital culture in the broadest sense.

**Sounding the Limits of Life**
Essays in the Anthropology of Biology and Beyond
Stefan Helmreich
With contributions from Sophia Roosth & Michele Friedner

“In this timely collection of writings on life, water, and sound, one of anthropology’s most eloquent essayists delivers a truly sensational analysis of the geobiological politics shaping our multispecies world. Stefan Helmreich has reinvented participant observation for his discipline and beyond in this erudite and prescient work that will appeal to a broad audience.”
—Sarah Franklin, University of Cambridge

“This richly textured book is an inspirational contribution to anthropology and science studies. It is certain to stand the test of time as a work of stunning imagination and solid scholarly exploration.”
—Debbora Battaglia, Mount Holyoke College

What is life? What is water? What is sound? In *Sounding the Limits of Life*, anthropologist Stefan Helmreich investigates how contemporary scientists—biologists, oceanographers, and audio engineers—are redefining these crucial concepts. Life, water, and sound are phenomena at once empirical and abstract, material and formal, scientific and social. In the age of synthetic biology, rising sea levels, and new technologies of listening, these phenomena stretch toward their conceptual snapping points, breaching the boundaries between the natural, cultural, and virtual.

**Righteous Transgressions**
Women's Activism on the Israeli and Palestinian Religious Right
Lihi Ben Shitrit

“This excellent and rigorously researched book enhances our understanding of Jewish and Muslim religious-political movements and women's attendant roles in ways that have remained largely unaddressed until now. By providing a window into a world seldom seen, let alone traversed, it challenges common understandings about these movements and women's agency therein.”
—Sara Roy, Harvard University

How do women in conservative religious movements expand spaces for political activism in ways that go beyond their movements' strict ideas about male and female roles? How and why does this activism happen in some movements but not in others?

**Righteous Transgressions** examines these questions by comparatively studying four groups: the Jewish settlers in the West Bank, the ultra-Orthodox Shas, the Islamic Movement in Israel, and the Palestinian Hamas. Lihi Ben Shitrit demonstrates that women's prioritization of a nationalist agenda over a proselytizing one shapes their activist involvement.

**Young Islam**
The New Politics of Religion in Morocco and the Arab World
Avi Max Spiegel

“Finally, an examination of Islamism that eschews the abstract generalizations and simple dichotomies that plague our conversations about political Islam. By presenting Islamism as a dynamic and complex amalgamation of competing organizations and orientations, Spiegel provides a fascinating glimpse into the future of the Middle East.”
—Reza Aslan, author of *No god but God*

Today, two-thirds of all Arab Muslims are under the age of thirty. *Young Islam* takes readers inside the evolving competition for their support—a competition not simply between Islamism and the secular world, but between different and often conflicting visions of Islam itself.

The first book to shed light on this new and uncharted era of Islamist pluralism in the Middle East and North Africa, *Young Islam* uncovers the rivalries that are redefining the next generation of political Islam.

**The Sunni Tragedy in the Middle East**
Northern Lebanon from al-Qaeda to ISIS
Bernard Rougier

“This is a rare and wonderful book. Rougier makes a truly original contribution to the study of the modern Middle East.”
—Roger Owen, author of *The Rise and Fall of Arab Presidents for Life*

Northern Lebanon is a land in turmoil. Long under the sway of the Assad regime in Syria, it is now a magnet for Sunni Muslim jihadists inspired by anti-Western and anti-Shi'ī worldviews. *The Sunni Tragedy in the Middle East* describes in harrowing detail the struggle led by an active minority of jihadist militants, some claiming allegiance to ISIS, to seize control of Islam and impose its rule over the region's Sunni Arab population.

This riveting book is based on more than a decade of research, more than one hundred in-depth interviews with players at all levels, and Rougier's extraordinary access to original source material. Written by one of the world's leading experts on jihadism, *The Sunni Tragedy in the Middle East* provides timely insight into the social, political, and religious life of this dangerous and strategically critical region of the Middle East.

Soft Force
Women in Egypt’s Islamic Awakening
Ellen Anne McLarney

“This is an eloquent and carefully argued book. Clear, engaging, and sophisticated, *Soft Force* is crucial for a more complete understanding of the origins of contemporary and ongoing debates about women, Islam, and public life in Egypt.”

—Lara Deeb, coauthor of *Leisurely Islam: Negotiating Geography and Morality in Shi’ite South Beirut*

In the decades leading up to the Arab Spring in 2011, when Hosni Mubarak’s authoritarian regime was swept from power in Egypt, Muslim women took a leading role in developing a robust Islamist presence in the country’s public sphere. *Soft Force* examines the writings and activism of these women—including scholars, preachers, journalists, critics, actors, and public intellectuals—who envisioned an Islamic awakening in which women’s rights and the family, equality, and emancipation were at the center. Bold and insightful, *Soft Force* transforms our understanding of women’s rights, women’s liberation, and women’s equality in Egypt’s Islamic revival.

Of Sand or Soil
Genealogy and Tribal Belonging in Saudi Arabia
Nadav Samin

“This significant book explains why tribal genealogies are important in contemporary Saudi Arabia. Samin draws on a wide range of theoretical approaches and argues that tribal genealogies remain resilient as a result of social and political changes related to such factors as the Saudi state, urbanization, and migration.”

—Madawi Al-Rasheed, London School of Economics and Political Science

Why do tribal genealogies matter in modern-day Saudi Arabia? What compels the strivers and climbers of the new Saudi Arabia to want to prove their authentic descent from one or another prestigious Arabian tribe? *Of Sand or Soil* looks at how genealogy and tribal belonging have informed the lives of past and present inhabitants of Saudi Arabia and how the Saudi government’s tacit glorification of tribal origins has shaped the powerful development of the kingdom’s genealogical culture.
