The Battle of Bretton Woods
John Maynard Keynes, Harry Dexter White, and the Making of a New World Order

Benn Steil

When turmoil strikes world monetary and financial markets, leaders invariably call for “a new Bretton Woods” to prevent catastrophic economic disorder and defuse political conflict. The name of the remote New Hampshire town where representatives of forty-four nations gathered in July 1944, in the midst of the century’s second great war, has become shorthand for enlightened globalization. The actual story surrounding the historic Bretton Woods accords, however, is full of startling drama, intrigue, and rivalry, which are vividly brought to life in Benn Steil’s epic account.

Upending the conventional wisdom that Bretton Woods was the product of an amiable Anglo-American collaboration, Steil shows that it was in reality part of a much more ambitious geopolitical agenda hatched within President Franklin D. Roosevelt’s Treasury and aimed at eliminating Britain as an economic and political rival. At the heart of the drama were the antipodal characters of John Maynard Keynes, the renowned and revolutionary British economist, and Harry Dexter White, the dogged, self-made American technocrat. Bringing to bear new and striking archival evidence, Steil offers the most compelling portrait yet of the complex and controversial figure of White—the architect of the dollar’s privileged place in the Bretton Woods monetary system, who also, very privately, admired Soviet economic planning and engaged in clandestine communications with Soviet intelligence officials and agents over many years.

A remarkably deft work of storytelling that reveals how the blueprint for the postwar economic order was actually drawn, The Battle of Bretton Woods is destined to become a classic of economic and political history.

Benn Steil is senior fellow and director of international economics at the Council on Foreign Relations.

“A Council on Foreign Relations Book

press.princeton.edu general interest • 1

“Benn Steil has written a wonderfully rich and vivid account of the making of the postwar economic order. The Battle of Bretton Woods tells the fascinating story of the contest between the United States and Britain, led by the outsized personalities of Harry Dexter White and John Maynard Keynes, to reconcile their competing visions and interests.”
—Liaquat Ahamed, author of Lords of Finance

The Federal Reserve and the Financial Crisis
Ben S. Bernanke

In 2012, Ben Bernanke, chairman of the U.S. Federal Reserve, gave a series of lectures about the Federal Reserve and the 2008 financial crisis, as part of a course at George Washington University on the role of the Federal Reserve in the economy. In this unusual event, Bernanke revealed important background and insights into the central bank’s crucial actions during the worst financial crisis since the Great Depression. Taken directly from these historic talks, The Federal Reserve and the Financial Crisis offers insight into the guiding principles behind the Fed’s activities and the lessons to be learned from its handling of recent economic challenges.

Bernanke traces the origins of the Federal Reserve, from its inception in 1914 through the Second World War, and he looks at the Fed post-1945, when it began operating independently from other governmental departments such as the Treasury. During this time the Fed grappled with episodes of high inflation, finally tamed by then-chairman Paul Volcker. Bernanke also explores the period under his predecessor, Alan Greenspan, known as the Great Moderation. Bernanke then delves into the Fed’s reaction to the recent financial crisis, focusing on the central bank’s role as the lender of last resort and discussing efforts that injected liquidity into the banking system. Bernanke points out that monetary policies alone cannot revive the economy, and he describes ongoing structural and regulatory problems that need to be addressed.

Providing first-hand knowledge of how problems in the financial system were handled, The Federal Reserve and the Financial Crisis will long be studied by those interested in this critical moment in history.

Ben S. Bernanke is chairman of the U.S. Federal Reserve. He has served as chairman of the President’s Council of Economic Advisors and as a member of the Board of Governors of the Federal Reserve. Before his time in public service he was a professor of economics at Princeton University.

“It is rare indeed to find a Fed chairman looking back and explaining the Fed’s actions. In this valuable book, Ben Bernanke argues strongly that the Fed’s decisions during the financial crisis were consistent with longstanding central banking practices. His account is an important part of the historical record.”
—Alan Blinder, Princeton University

The Bankers’ New Clothes
What’s Wrong with Banking and What to Do about It
Anat Admati & Martin Hellwig

What is wrong with today’s banking system? The past few years have shown that risks in banking can impose significant costs on the economy. Many claim, however, that a safer banking system would require sacrificing lending and economic growth. The Bankers’ New Clothes examines this claim and the narratives used by bankers, politicians, and regulators to rationalize the lack of reform, exposing them as invalid.

Anat Admati and Martin Hellwig argue we can have a safer and healthier banking system without sacrificing any of the benefits of the system, and at essentially no cost to society. They show that banks are as fragile as they are not because they must be, but because they want to be—and they get away with it. Whereas this situation benefits bankers, it distorts the economy and exposes the public to unnecessary risks. Weak regulation and ineffective enforcement allowed the buildup of risks that ushered in the financial crisis of 2007–2009. Much can be done to create a better system and prevent crises. Yet the lessons from the crisis have not been learned.

Admati and Hellwig seek to engage the broader public in the debate by cutting through the jargon of banking, clearing the fog of confusion, and presenting the issues in simple and accessible terms. The Bankers’ New Clothes calls for ambitious reform and outlines specific and highly beneficial steps that can be taken immediately.

Anat Admati is the George G. C. Parker Professor of Finance and Economics at Stanford’s Graduate School of Business. She serves on the FDIC Systemic Resolution Advisory Committee and has contributed to the Financial Times, Bloomberg News, and the New York Times. Martin Hellwig is director at the Max Planck Institute for Research on Collective Goods. He was the first chair of the Advisory Scientific Committee of the European Systemic Risk Board and the cowinner of the 2012 Max Planck Research Award for his work on financial regulation.

March 2013. 392 pages. 6 line illus. 4 tables.
Cl: 978-0-691-15684-2 $29.95 | £19.95

“This brilliant book demystifies banking for everyone and explains what is really going on. Investors, policymakers, and all citizens owe it to themselves to listen.”

“Almost subversive in its clarity, The Bankers’ New Clothes is the most important book about banking in a very long time…. Future efforts to regulate the financial system should start here.”
—Kenneth S. Rogoff, coauthor of This Time Is Different: Eight Centuries of Financial Folly
How can developing countries grow their economies? Most answers to this question center on what the rich world should or shouldn’t do for the poor world. In *The Quest for Prosperity*, Justin Yifu Lin— the first non-Westerner to be chief economist of the World Bank— focuses on what developing nations can do to help themselves.

Since the end of the Second World War, prescriptions for economic growth have come and gone. Often motivated more by ideology than practicality, these blueprints have had mixed success on the ground. Drawing lessons from history, economic analysis, and practice, Lin examines how the countries that have succeeded in developing their own economies have actually done it. He shows that economic development is a process of continuous technological innovation, industrial upgrading, and structural change driven by how countries harness their land, labor, capital, and infrastructure. Countries need to identify and facilitate the development of those industries where they have a comparative advantage— where they can produce products most effectively—and use them as a basis for development. At the same time, states need to recognize the power of markets, limiting the role of government to allow firms to flourish and lead the process of technological innovation and industrial upgrading. By following this “new structural economics” framework, Lin shows how even the poorest nations can grow at eight percent or more continuously for several decades, significantly reduce poverty, and become middle- or even high-income countries in the span of one or two generations.

Interwoven with insights, observations, and stories from Lin’s travels as chief economist of the World Bank and his reflections on China’s rise, this book provides a road map and hope for those countries engaged in their own quest for prosperity.

Justin Yifu Lin is founding director and professor of the China Centre for Economic Research at Peking University. From 2008 to 2012, he served as chief economist and senior vice president of the World Bank.

The Great Rebalancing
Trade, Conflict, and the Perilous Road Ahead for the World Economy
Michael Pettis

“This is a brilliant book, one that absolutely must be read by all who are concerned with globalization’s future.”
—Clyde Prestowitz, author of The Betrayal of American Prosperity

China’s economic growth is sputtering, the Euro is under threat, and the United States is combating serious trade disadvantages. Another Great Depression? Not quite. Noted economist and China expert Michael Pettis argues instead that we are undergoing a critical rebalancing of the world economies. Debunking popular misconceptions, Pettis shows that severe trade imbalances spurred on the recent financial crisis and were the result of unfortunate policies that distorted the savings and consumption patterns of certain nations. Pettis examines the reasons behind these destabilizing policies, and he predicts severe economic dislocations that will have long-lasting effects.

Michael Pettis is professor of finance and economics at Peking University, a senior associate at the Carnegie Endowment, and a widely read commentator on China, Europe, and the global economy.

The Leaderless Economy
Why the World Economic System Fell Apart and How to Fix It
Peter Temin & David Vines

“In this thoughtful and cogently argued book, Temin and Vines enlist the history of the Great Depression to provide a powerful set of dos and don’ts for the current financial crisis. The interesting question they pose is why today’s policymakers, to a remarkable and alarming extent, have embraced the don’ts.”
—Barry Eichengreen, author of Exorbitant Privilege: The Rise and Fall of the Dollar and the Future of the International Monetary System

The Leaderless Economy reveals why international financial cooperation is the only solution to today’s global economic crisis. In this timely and important book, Peter Temin and David Vines argue that our current predicament is a catastrophe rivaled only by the Great Depression. Taking an in-depth look at the history of both, they explain what went wrong and why, and demonstrate why international leadership is needed to restore prosperity and prevent future crises.

Peter Temin is the Elisha Gray II Professor Emeritus of Economics at the Massachusetts Institute of Technology. David Vines is professor of economics and a Fellow of Balliol College, University of Oxford.

February 2013. 320 pages. 1 halftone. 19 line illus. 6 tables. Cl: 978-0-691-15743-6 $29.95 | £19.95
Robert J. Shiller
Finance and the Good Society
Robert J. Shiller

“Shiller comes across as pragmatic as well as visionary, explaining how much financial capitalism has done for society and how much more it could do if harnessed for the common good.”
—James Pressley, Bloomberg News

“A persuasive case for a fresh view of an industry that is too glibly demonized.”
—Sebastian Mallaby, New York Times Book Review

“Deeply intelligent and elegantly argued.”
—BizEd

“Wonderfully persuasive…. Shiller reminds us of the profound importance of finance to making our society work.”
—Robin Harding, Financial Times

“Rigorous.”
—Howard Davies, Times Literary Supplement

Robert J. Shiller is the Arthur M. Okun Professor of Economics at Yale University.

**The Long Divergence**
How Islamic Law Held Back the Middle East

Timur Kuran

“Professor Kuran’s book offers the best explanation yet for why the Middle East has lagged. After poring over ancient business records, [he] persuasively argues that what held the Middle East back wasn’t Islam as such, or colonialism, but rather various secondary Islamic legal practices that are no longer relevant today.”
—Nicholas D. Kristof, *New York Times*

“This is a book to be not just tasted but chewed and digested…. Clearly presented quantitative data and illuminating anecdotes … add up to a fine feast.”
—L. Carl Brown, *Foreign Affairs*

“Kuran’s arguments have broad implications for the debate about how to foster economic development.”
—Economist

Timur Kuran is professor of economics and political science and the Gorter Family Professor of Islamic Studies at Duke University.

2012. 424 pages. 12 halftones. 8 line illus. 10 tables. 2 maps.

With a new afterword by the author
The Darwin Economy
Liberty, Competition, and the Common Good
Robert H. Frank

“[I]mpressive, original and thoughtful.”
—Tim Harford, Financial Times

“[I]mportant.”
—Nicholas D. Kristof, New York Times

In The Darwin Economy, Robert Frank predicts that within the next century Charles Darwin will unseat Adam Smith as the intellectual founder of economics. The reason, Frank argues, is that Darwin’s understanding of competition describes economic reality far more accurately than Smith’s. Far from creating a perfect world, economic competition often leads to “arms races,” encouraging behaviors that not only cause enormous harm to the group but also provide no lasting advantages for individuals, since any gains tend to be relative and mutually offsetting.

Robert H. Frank is an economics professor at Cornell’s Johnson Graduate School of Management, a regular “Economic View” columnist for the New York Times, and a Distinguished Senior Fellow at Demos.

Forthcoming
Worldly Philosopher
The Odyssey of Albert O. Hirschman
Jeremy Adelman

“This is an exceptional book. Hirschman’s intellectual and political journey is described with sharpness and perspicacity. Family life, cultural encounters, and the imprints of a lifetime highlight the importance and significance of one of the most creative intellectuals of the twentieth century, who had a profound influence on so many people around the world, including myself.”
—Fernando Henrique Cardoso, former president of Brazil

Worldly Philosopher chronicles the times and writings of Albert O. Hirschman, one of the twentieth century’s most original and provocative thinkers. In this gripping biography, Jeremy Adelman tells the story of a man shaped by modern horrors and hopes, a worldly intellectual who fought for and wrote in defense of the values of tolerance and change.

Jeremy Adelman is the Walter Samuel Carpenter III Professor of Spanish Civilization and Culture and director of the Council for International Teaching and Research at Princeton University.

**Political Bubbles**
Financial Crises and the Failure of American Democracy
Nolan McCarty, Keith T. Poole & Howard Rosenthal

“This extremely interesting book subtly argues that political bubbles are an important dimension of financial bubbles. Financial bubbles are caused by exuberant expectations and greed, but political bubbles are about how institutions channel ideology and interest into outcomes. The authors make clear how polarization produces gridlock and leads reformers to prefer regulation over legislation—with attendant problems.”
—James Alt, Harvard University

The first full accounting of how politics produces financial ruptures, *Political Bubbles* offers timely lessons that all sectors would do well to heed.

Nolan McCarty is the Susan Dod Brown Professor of Politics and Public Affairs and chair of the Department of Politics at Princeton University. Keith T. Poole is the Philip H. Alston Jr. Distinguished Professor in the Department of Political Science at the University of Georgia. Howard Rosenthal is professor of politics at New York University and the Roger Williams Straus Professor of Social Sciences, Emeritus, at Princeton University.

June 2013. 296 pages. 3 halftones. 26 line illus. 11 tables.

**Why Philanthropy Matters**
How the Wealthy Give, and What It Means for Our Economic Well-Being
Zoltan J. Acs

“This marvelous and insightful book provides, to my knowledge, the first link between the philanthropist and economic performance. Exceptionally original and a pleasure to read, it will induce many scholars and policymakers to reconsider the way they think about the economy and the important role played by philanthropy.”
—David B. Audretsch, Indiana University

Philanthropy has long been a distinctive feature of American culture, but its crucial role in the economic well-being of the nation—and the world—has remained largely unexplored. *Why Philanthropy Matters* takes an in-depth look at philanthropy as an underappreciated force in capitalism, measures its critical influence on the free-market system, and demonstrates how American philanthropy could serve as a model for the productive reinvestment of wealth in other countries.

Zoltan J. Acs is University Professor and director of the Center for Entrepreneurship and Public Policy in the School of Public Policy at George Mason University.

March 2013. 272 pages. 4 line illus.

A Cooperative Species
Human Reciprocity and Its Evolution
Samuel Bowles & Herbert Gintis

“The achievement of Bowles and Gintis is to have put together from the many disparate sources of evidence a story as plausible as any we’re likely to get in the present state of behavioural sciences of how human beings came to be as co-operative as they are.”
—W. G. Runciman, London Review of Books

“A sustained and detailed argument for how genes and culture have together shaped our ability to cooperate.”
—Peter Richerson, Nature

A Cooperative Species shows how genetic and cultural evolution has produced a species in which substantial numbers make sacrifices to uphold ethical norms and to help even total strangers. The book demonstrates that groups that created institutions to protect the civic-minded from exploitation by the selfish flourished and prevailed in conflicts with less cooperative groups.

Samuel Bowles heads the Behavioral Sciences Program at the Santa Fe Institute and teaches economics at the University of Siena. Herbert Gintis holds faculty positions at the Santa Fe Institute, Central European University, and the University of Siena.

Forthcoming Paperback

The Measure of Civilization
How Social Development Decides the Fate of Nations
Ian Morris

In the last thirty years, there have been fierce debates over how civilizations develop and why the West became so powerful. The Measure of Civilization presents a brand-new way of investigating these questions and provides new tools for assessing the long-term growth of societies. Using a groundbreaking numerical index of social development that compares societies in different times and places, award-winning author Ian Morris gives a sweeping examination of Eastern and Western development across 15,000 years since the end of the last ice age. He offers surprising conclusions about when and why the West came to dominate the world and fresh perspectives for thinking about the twenty-first century.

Resolving some of the biggest debates in global history, The Measure of Civilization puts forth innovative tools for determining past, present, and future economic and social trends.

Ian Morris is the Jean and Rebecca Willard Professor of Classics and professor of history at Stanford University.

Human Capitalism
How Economic Growth Has Made Us Smarter—and More Unequal
Brink Lindsey

“Human Capitalism is a compelling and important account of how and why people are being left behind in an increasingly complex economy. This is a ‘big think’ book that is both deeper and broader than the usual polemical arguments about inequality. Regardless of which side of the political divide you sit on, Lindsey will likely stimulate and infuriate you in equal measure.”
—Tyler Cowen, author of The Great Stagnation

What explains the growing class divide between the well educated and everybody else? Noted author Brink Lindsey, a senior fellow at the Cato Institute, argues that it’s because economic expansion is creating an increasingly complex world in which only a minority with the right knowledge and skills—the right “human capital”—reap the majority of the economic rewards. The complexity of today’s economy is not only making these lucky elites richer—it is also making them smarter. But unfortunately, even as the rich are securely riding this virtuous cycle, the poor are trapped in a vicious one, as a lack of human capital leads to family breakdown, unemployment, dysfunction, and further erosion of knowledge and skills.

Brink Lindsey is a senior fellow at the Cato Institute and the Ewing Marion Kauffman Foundation.

The Invisible Hook
The Hidden Economics of Pirates
Peter T. Leeson

“The Invisible Hook is an excellent book by one of the most creative young economists around.”
—Steven D. Levitt, Freakonomics blog

Portfolios of the Poor
How the World’s Poor Live on $2 a Day
Daryl Collins, Jonathan Morduch, Stuart Rutherford & Orinda Ruthven

“A must-read book for social entrepreneurs combating global poverty.”
—Jonathan C. Lewis, iOnPoverty

Beyond the Invisible Hand
Groundwork for a New Economics
Kaushik Basu

“In this remarkable tour de force, Kaushik Basu scrutinizes the foundational assumptions of economics and asks new and important questions.”
—Justin Yifu Lin, chief economist, World Bank

The Secrets of Pirate Management
from The Invisible Hook: The Hidden Economics of Pirates
Peter T. Leeson

What can today’s corporate raiders learn from the scourge of the high seas? A lot, as it turns out! Pirates have a surprising amount to teach about building better organizations, promoting diversity in the workplace, and creating powerful brands, among many other business lessons. Curious to hear more? Then sign up for Professor Blackbeard’s Management 101 class. And don’t be late. He’s got a hell of a temper.

The Second Great Contraction
from This Time Is Different
Carmen M. Reinhart & Kenneth S. Rogoff

We’ve been assured that the recession is over, but the country and the economy continue to feel the effects of the 2008 financial crisis, and people are still searching for answers about what caused it, what it has wrought, and how we can recover. This selection from the best-selling book This Time Is Different—the definitive history of financial crises, including the recent subprime meltdown—answers these questions and more.

The Handbook of Organizational Economics
Edited by Robert Gibbons & John Roberts

“No longer can economics be accused of treating the organization as a black box. Gibbons and Roberts, intellectual leaders in the area of organizational economics, have assembled a comprehensive survey of how economic tools can shine a light on the messy world of organizations. The volume demonstrates that organizational economics has arrived as a mature, vigorous field that others must engage with. Every serious student of organizations and management will find inspiration and insight in this handbook.” —Jesper Sørensen, Stanford University

In even the most market-oriented economies, most economic transactions occur not in markets but inside managed organizations, particularly business firms. Organizational economics seeks to understand the nature and workings of such organizations and their impact on economic performance. This landmark book assembles the leading figures in organizational economics to present the first comprehensive view of both the current state of research in this fast-emerging field and where it might be headed.

Robert Gibbons is the Sloan Distinguished Professor of Management at the Massachusetts Institute of Technology. John Roberts is the John H. Scully Professor of Economics, Strategic Management, and International Business at Stanford University.

From Neighborhoods to Nations
The Economics of Social Interactions
Yannis M. Ioannides

“Ioannides has accomplished a remarkable survey and synthesis of the scattered literature on urbanization as a response to nonmarket factors. He starts with an overview of the theory and econometrics of social interactions. Then, the book surveys the large and diverse studies on the economic and social interactions within and among cities. The studies are given unity by reference to the basic theory of social interactions, always including the market implications. This is an important synthesis of material to which the author has been a major contributor.” —Kenneth J. Arrow, Nobel Laureate in Economics

Just as we learn from, influence, and are influenced by others, our social interactions drive economic growth in cities, regions, and nations—determining where households live, how children learn, and what cities and firms produce. From Neighborhoods to Nations synthesizes the recent economics of social interactions for anyone seeking to understand the contributions of this important area.

Yannis M. Ioannides is the Max and Herta Neubauer Professor of Economics at Tufts University.

2012. 544 pages. 14 line illus. 7 tables.

Microeconomic Foundations I
Choice and Competitive Markets
David M. Kreps

“This book is a gold mine for students—or teachers—who wish to learn the foundations of modern economics. David Kreps’s creative contributions to finance, game theory, and decision theory have transformed those fields, and this book reveals part of his technology: a deep understanding of the foundations of modern microeconomics. If you want to improve or revolutionize economics, you must first master the foundations. This book—and a lot of hard work—will help you get there.”
—Thomas J. Sargent, Nobel Laureate in Economics

Microeconomic Foundations I develops the choice, price, and general equilibrium theory topics typically found in first-year theory sequences, but in deeper and more complete mathematical form than most standard texts provide. The objective is to take the reader from acquaintance with these foundational topics to something closer to mastery of the models and results connected to them.

David M. Kreps is the Adams Distinguished Professor of Management at Stanford University’s Graduate School of Business.

2012. 584 pages. 46 line illus. 5 tables. Cl: 978-0-691-15583-8 $39.50 | £27.95

New—Second Edition
Lecture Notes in Microeconomic Theory
The Economic Agent
Ariel Rubinstein

Praise for the first edition:

“This book will be a valuable addition to the small collection of high-level texts in microeconomics. It is distinguished by Rubinstein’s characteristic skill in choice of topics and exposition, and by his unique perspective on economic theory and game theory.”
—Vincent Crawford, University of California, San Diego

This book presents Ariel Rubinstein’s lecture notes for the first part of his well-known graduate course in microeconomics. Developed during the fifteen years that Rubinstein taught the course at Tel Aviv University, Princeton University, and New York University, these notes provide a critical assessment of models of rational economic agents, and are an invaluable supplement to any primary textbook in microeconomic theory.

Written by one of the world’s most respected and provocative economic theorists, this second edition of Lecture Notes in Microeconomic Theory is essential reading for students, teachers, and research economists.

Ariel Rubinstein is professor of economics at Tel Aviv University and New York University.

2012. 168 pages. 21 line illus. 3 tables. Pa: 978-0-691-15413-8 $35.00 | £24.95
New Lectures on Behavioral Macroeconomics
Paul De Grauwe

“De Grauwe voices the concerns of many macroeconomists regarding the empirical plausibility of the rational expectations assumption. He shows how a parsimonious, boundedly rational approach can improve the fit of sticky price macro models to the data in a number of important dimensions.”
—John Duffy, University of Pittsburgh

In mainstream economics, and particularly in New Keynesian macroeconomics, the booms and busts that characterize capitalism arise because of large external shocks. The combination of these shocks and the slow adjustments of wages and prices by rational agents leads to cyclical movements. In this book, Paul De Grauwe argues for a different macroeconomics model—one that works with an internal explanation of the business cycle and factors in agents’ limited cognitive abilities. By creating a behavioral model that is not dependent on the prevailing concept of rationality, De Grauwe is better able to explain the fluctuations of economic activity that are an endemic feature of market economies. This new approach illustrates a richer macroeconomic dynamic that provides for a better understanding of fluctuations in output and inflation.

Paul De Grauwe is professor of international economics at the London School of Economics and Political Science.

New—Second Edition
Macroeconomic Theory
A Dynamic General Equilibrium Approach
Michael Wickens

“There are very few good textbooks on the dynamic general equilibrium approach to macroeconomics; Macroeconomic Theory fills a big void and provides a comprehensive and integrated approach to the subject that covers both real and monetary models. Professor Wickens develops a series of topics, beginning with real models of the economy and proceeding through growth, fiscal policy, financial models, and the modern approach to monetary economies. Each topic begins with theoretical background and proceeds to practical applications. The level is appropriate for master’s or advanced undergraduate students and is a welcome addition to the field that is likely to be widely adopted.”
—Roger E. A. Farmer, University of California, Los Angeles

Macroeconomic Theory is the most up-to-date graduate-level macroeconomics textbook available today. This revised second edition emphasizes the general equilibrium character of macroeconomics to explain effects across the whole economy while taking into account recent research in the field. It is the perfect resource for students and researchers seeking coverage of the most current developments in macroeconomics.

Michael Wickens is professor of economics at the University of York and at Cardiff Business School.
New

Rethinking Expectations
The Way Forward for Macroeconomics
Edited by Roman Frydman & Edmund S. Phelps

“Microeconomic Foundations of Employment and Inflation Theory, edited by Edmund Phelps forty years ago, established the concept of ‘micro foundations’ as an essential macroeconomics idea. Later, ‘rational expectations’ was added as the second pillar of the current standard macro model. Recent events have challenged the validity of that model. This new Phelps volume, coedited with Roman Frydman, challenges and offers alternatives to the second pillar while retaining the first. It is a must-read.”
—Dale Mortensen, Nobel Laureate in Economics

Roman Frydman is professor of economics at New York University. Edmund S. Phelps, the winner of the 2006 Nobel Prize in Economics, is director of Columbia University’s Center on Capitalism and Society.

Forthcoming—Third Edition

Rational Expectations and Inflation
Thomas J. Sargent

“Sargent’s work on inflation remains central to cutting-edge research in economics as well as to current and momentous policy decisions. Are the United States and Europe headed toward inflation with our large and intractable deficits? Will the European currency union survive? The breakthrough theoretical insights and brilliant case studies in this book are still the foundations that anyone thinking about these questions needs to read, and then to read again.”
—John H. Cochrane, author of Asset Pricing

This collection of essays uses the lens of rational expectations theory to examine how governments anticipate and plan for inflation, and provides insight into the pioneering research for which Thomas Sargent was awarded the 2011 Nobel Prize in economics.

Thomas J. Sargent is professor of economics at New York University.

June 2013. 280 pages. Cl: 978-0-691-15870-9 $39.95 | £27.95

Remembering Inflation
Brigitte Granville

“Granville recalls the inflation of the 1970s, which, she fears, is in danger of being forgotten in the wake of the recent financial crisis and the ongoing recession. She covers a wide swath of macroeconomics and takes in the causes of inflation, the relation between unemployment and inflation, the Phillips curve, the role of expectations, and much more. I don’t know of any other book quite like this.”
—John Driffill, Birkbeck, University of London

Brigitte Granville is professor of international economics and economic policy at Queen Mary University of London.

August 2013. 232 pages. 25 line illus. Cl: 978-0-691-14540-2 $29.95 | £19.95

The Conquest of American Inflation
Thomas J. Sargent

“A path-breaking contribution.”
—Ramon Marimon, Journal of Economic Literature

2002. 168 pages. 25 line illus.
Pa: 978-0-691-09012-2 $45.00 | £30.95
Rational Decisions
Ken Binmore

“Strong on ideas and opinions but low on jargon, this is one of the most lively discussions of the strengths and limitations of the Bayesian approach to decision making that I have ever come across. Clearly and strongly argued, controversial, and a pleasure to read.”
—Riccardo Rebonato, author of Plight of the Fortune Tellers

2011. 216 pages. 43 line illus.
Pa: 978-0-691-14989-9 $26.95 | £18.95
Cl: 978-0-691-13074-3 $62.95 | £43.95

Forward-Looking Decision Making
Robert E. Hall

“Forward-Looking Decision Making provides interesting applications of the dynamic programming approach for analyzing individual decisions that balance current and future welfare.”
—John Ermisch, University of Essex

2010. 144 pages. 30 line illus.
Cl: 978-0-691-14242-5 $52.50 | £36.95

The New Dynamic Public Finance
Narayana R. Kocherlakota

“Much of the theory of public finance was recently transformed when new work incorporated the subtle interaction of dynamics and risk. Narayana Kocherlakota, one of the top contributors to this new literature, has now given us a masterful exposition of its methods and results. This is a must-read for graduate students and researchers alike.”
—Bernard Salanie, Columbia University

2010. 232 pages. 15 line illus.
Cl: 978-0-691-13915-9 $45.00 | £30.95

Lawlessness and Economics
Alternative Modes of Governance
Avinash K. Dixit

“Policy-oriented or not, scholars hoping to make a contribution in the area of governance in less developed countries would do well to begin with this brilliant book.”
—James E. Rauch, Journal of Economic Literature

2007. 184 pages. 13 line illus. 6 tables.

Game Theory
An Introduction
Steven Tadelis

“Steve Tadelis’s Game Theory is an ideal textbook for advanced undergraduates, and great preparation for graduate work. It provides a clear, self-contained, and rigorous treatment of all the key concepts, along with interesting applications; it also introduces key technical tools in a straightforward and intuitive way.”
—Drew Fudenberg, Harvard University

This comprehensive textbook introduces readers to the principal ideas and applications of game theory, in a style that combines rigor with accessibility. Steven Tadelis begins with a concise description of rational decision making, and goes on to discuss strategic and extensive form games with complete information, Bayesian games, and extensive form games with imperfect information. He covers a host of topics, including multi-stage and repeated games, bargaining theory, auctions, rent-seeking games, mechanism design, signaling games, reputation building, and information transmission games.

Steven Tadelis is associate professor and Barbara and Gerson Bakar Faculty Fellow at the Haas School of Business at the University of California, Berkeley, and a Distinguished Economist at eBay Research Labs.

**Dark Markets**
Asset Pricing and Information Transmission in Over-the-Counter Markets
Darrell Duffie

“Over-the-counter markets concern a large set of financial assets and received significant attention during the recent financial crisis. Darrell Duffie has been a key contributor to a promising new area of research that seeks to understand the behavior of these markets. His comprehensive, rigorous book will be very useful to all researchers interested in this important subject.”
—Dimitri Vayanos, London School of Economics and Political Science

Darrell Duffie is the Dean Witter Distinguished Professor of Finance at Stanford University’s Graduate School of Business.

**Pricing the Planet’s Future**
The Economics of Discounting in an Uncertain World
Christian Gollier

“Pricing the Planet’s Future explores the history and future of the modern economic theory of discounting and its consequences for sustainable development. Written for professional economists and graduate students, this book is one of the best on dynamic decision making.”
—Jason Shogren, University of Wyoming

The objective of *Pricing the Planet’s Future* is to provide a simple framework to organize the debate on what we should do for the future.

Christian Gollier is professor of economics at the University of Toulouse and director of the Toulouse School of Economics.

2012. 248 pages. 27 line illus. 10 tables.

Yield Curve Modeling and Forecasting
The Dynamic Nelson-Siegel Approach
Francis X. Diebold & Glenn D. Rudebusch

“This lucid and concise book is unique in the field of term structure modeling. It leads readers from yield curve basics, with a popular and intuitive term structure model, to the frontiers of academia in associated fields. By the end of the book, readers will be inspired and enlightened enough to push those frontiers in the many open research directions noted by the authors, particularly in the emerging field of macro-finance.”
—Leo Krippner, Reserve Bank of New Zealand

Based on the Econometric and Tinbergen Institutes Lectures, Yield Curve Modeling and Forecasting contains essential tools with enhanced utility for academics, central banks, governments, and industry.

Francis X. Diebold is the Paul F. and Warren S. Miller Professor of Economics at the University of Pennsylvania and professor of finance and statistics at the university’s Wharton School. Glenn D. Rudebusch is executive vice president and director of economic research at the Federal Reserve Bank of San Francisco.

**Sovereign Wealth Funds**
Legitimacy, Governance, and Global Power

*Gordon L. Clark, Adam D. Dixon & Ashby H. B. Monk*

“This original book sheds light on the forms and functions of sovereign wealth funds, and maps at the same time the global influence of these institutions. Providing an original classification of these funds, the authors offer a series of in-depth case studies that combine broad perspectives on the world economy with specific national examples.”
—Valeria Miceli, Università Cattolica, Milan

Gordon L. Clark is professor and executive director of the Smith School of Enterprise and the Environment at the University of Oxford, and the Sir Louis Matheson Distinguished Visiting Professor at Monash University. Adam D. Dixon is lecturer and university research fellow at the University of Bristol and visiting research associate at the University of Oxford. Ashby H. B. Monk is a research director at Stanford University and senior research associate at the University of Oxford.

July 2013. 216 pages. 11 line illus. 7 tables.

**Free Market Fairness**

*John Tomasi*

“An extremely interesting and important project.”
—*Ethics*

Can libertarians care about social justice? In *Free Market Fairness*, John Tomasi argues that they can and should. Drawing simultaneously on moral insights from defenders of economic liberty such as F. A. Hayek and advocates of social justice such as John Rawls, Tomasi presents a new theory of liberal justice.

John Tomasi is professor of political science at Brown University, where he is also the founder and director of Brown’s Political Theory Project.

May 2013. 384 pages. 3 tables.

Why Adjudicate?
Enforcing Trade Rules in the WTO
Christina L. Davis

“Christina Davis provides fresh insight into the adjudication of trade disputes. She convincingly argues that governments routinely file such disputes as a response to domestic political pressure, and she furnishes an impressive array of empirical evidence to substantiate this claim. The result is a book that will make a significant contribution to research on the political economy of international trade.”
—Edward Mansfield, University of Pennsylvania

Christina L. Davis is associate professor of politics and international affairs at Princeton University.

2012. 344 pages. 2 halftones. 4 line illus. 21 tables.

Affluence and Influence
Economic Inequality and Political Power in America
Martin Gilens

“Democracy is based on the ideal that every citizen has an equal potential to shape what government does. With care and without cant, Gilens shows that we are very far from this ideal in contemporary American politics. The economically privileged don’t always get what they want. But, according to Gilen’s pioneering analysis, they are much more influential than those below them on the economic ladder. Affluence and Influence is a landmark in the study of representation.”
—Jacob Hacker, coauthor of Winner-Take-All Politics

Martin Gilens is professor of politics at Princeton University.

The Oil Curse
How Petroleum Wealth Shapes the Development of Nations
Michael L. Ross
Countries that are rich in petroleum have less democracy, less economic stability, and more frequent civil wars than countries without oil. What explains this oil curse? And can it be fixed? In this groundbreaking analysis, Michael L. Ross looks at how developing nations are shaped by their mineral wealth—and how they can turn oil from a curse into a blessing.

Michael L. Ross is professor of political science at the University of California, Los Angeles.

March 2012. 312 pages. 46 line illus. 35 tables.

The Empire Trap
The Rise and Fall of U.S. Intervention to Protect American Property Overseas, 1893–2012
Noel Maurer

“Noel Maurer’s wonderful book explores a long-standing question: as European powers built world empires in the nineteenth century, why did the United States—the leading global economy—not follow suit? The Empire Trap provides readers with the definitive answer.”
—James Robinson, coauthor of Why Nations Fail

Throughout the twentieth century, the U.S. government willingly deployed power, hard and soft, to protect American investments all around the globe. Why did the United States get into the business of defending its citizens’ property rights abroad? The Empire Trap looks at how modern U.S. involvement in the empire business began, how American foreign policy became increasingly tied to the sway of private financial interests, and how postwar administrations finally extricated the United States from economic interventionism, even though the government had the will and power to continue.

Noel Maurer is associate professor of business administration at Harvard Business School.

August 2013. 512 pages. 39 line illus. 14 tables. 1 map. Cl: 978-0-691-15582-1 $39.50 | £27.95

Krupp
A History of the Legendary German Firm
Harold James

“More than a biography of a remarkable family, this fast-paced narrative, studded with vivid portraits and shrewd judgments, follows a firm that was once the largest in Europe as it navigated the existential crises of wars, inflations, depressions, dictatorships, and globalizations. Illuminating a corporate culture famous for its technological and marketing innovations, its paternalism and commitment to tradition, and its hostility to banks and indifference to profits, James offers us a deeper understanding of what makes German—and European—capitalism so different from our own.”
—Margaret Lavinia Anderson, University of California, Berkeley

The history of Krupp is the history of modern Germany. No company symbolized the best and worst of that history more than the famous steel and arms maker. In this book, Harold James tells the story of the Krupp family and its industrial empire between the early nineteenth century and the present, and analyzes its transition from a family business to one owned by a nonprofit foundation.

Harold James is professor of history and international affairs and the Claude and Lore Kelly Professor of European Studies at Princeton University. He is also the Marie Curie Visiting Professor at the European University Institute.

2012. 368 pages. 38 halftones. 3 line illus. 3 tables. Cl: 978-0-691-15340-7 $35.00 | £24.95
New Masters of the Universe
Hayek, Friedman, and the Birth of Neoliberal Politics
Daniel Stedman Jones

“Daniel Stedman Jones has an unusual talent—making the history of economic thought fascinating and significant. In tracing the evolution of neoliberal ideas and their implementation in public policy in Britain and the United States, he does a superb job of helping us understand both the last half-century of Atlantic history and the origins of the current crisis. No book could be more timely.”
—Eric Foner, Columbia University

Fascinating, important, and timely, this is a book for anyone who wants to understand the history behind the Anglo-American love affair with the free market, as well as the origins of the current economic crisis.

Daniel Stedman Jones is a barrister in London.

2012. 432 pages. 1 table.

One of Choice’s Top 25 Titles for 2011
Debtor Nation
The History of America in Red Ink
Louis Hyman

“(Debtor Nation) does a splendid job unpacking the origins and evolution of credit and debt in the US…. Hyman tells the story of America’s debt obsession engagingly and without an overabundance of jargon.”
—Asa Fitch, National

“As an elegantly crafted historical analysis of how consumer credit grew to a colossus, Debtor Nation is compelling reading. As a well-documented financial analysis, Debtor Nation exposes the weak underside of lenders’ balance sheets. Legislators should read it. Lobbyists for banks and other lenders may not be able to ignore it.”
—Andrew Allentuck, Financial Post

Louis Hyman is assistant professor of history at the ILR School of Cornell University.

The Roman Market Economy
Peter Temin

“Peter Temin’s fascinating book deploys the techniques of economic analysis to understand the nature of Roman trade, markets, and transactions, and definitively challenges the view of the Roman Empire as a ‘primitive’ economy. Stressing the importance of markets, trade, commerce, and banking, and emphasizing their prominence in the evidence from ancient texts and archaeology, Temin offers a sophisticated account of Rome’s economic institutions and practices that fundamentally revises and enriches our understanding of the prosperity and the decline of this major imperial power.”
—Alan K. Bowman, University of Oxford

Peter Temin is the Elisha Gray II Professor Emeritus of Economics at the Massachusetts Institute of Technology.

**Why Australia Prospered**
The Shifting Sources of Economic Growth
Ian W. McLean

This book is the first comprehensive account of how Australia attained the world’s highest living standards within a few decades of European settlement, and how the nation has sustained an enviable level of income to the present. Beginning with the Aboriginal economy at the end of the eighteenth century, Ian McLean argues that Australia’s remarkable prosperity across nearly two centuries was reached and maintained by several shifting factors. These included imperial policies, favorable demographic characteristics, natural resource abundance, institutional adaptability and innovation, and growth-enhancing policy responses to major economic shocks, such as war, depression, and resource discoveries.

Ian W. McLean is a visiting research fellow in economics at the University of Adelaide.

The Behavioral Foundations of Public Policy
Edited by Eldar Shafir

“Roll over, economists. We have always, pridefully, thought of ourselves as the major arbiters of good public policy: take it or leave it based on cost-benefit analysis. The Behavioral Foundations of Public Policy challenges that hegemony. In each interesting chapter—on topics ranging from discrimination and poverty to health, savings, and bureaucracy—the book shows the role of psychology in public policy. Only one word can describe this book: wow!”
—George Akerlof, Nobel Laureate in Economics

Eldar Shafir is the William Stewart Tod Professor of Psychology and Public Affairs in the Department of Psychology and the Woodrow Wilson School of Public and International Affairs at Princeton University.

2013. 536 pages. 35 line illus. 23 tables.

Economic Lives
How Culture Shapes the Economy
Viviana A. Zelizer

“An excellent introduction to, and summary of, [Zelizer’s] impressive oeuvre, [Economic Lives] makes a strong case for economists studying transactions within their cultural context.”
—Natalie Gold, Times Higher Education

“Immensely interesting and thought-provoking.”
—Library Journal

Over the past three decades, economic sociology has been revealing how culture shapes economic life. No one has played a greater role in this development than Viviana Zelizer, one of the world’s leading sociologists. Economic Lives synthesizes and extends her most important work to date, demonstrating the full breadth and range of her field-defining contributions in a single volume for the first time. This book offers a distinctive vision of economic activity that brings out the hidden meanings and social actions behind the supposedly impersonal worlds of production, consumption, and asset transfer.

Viviana A. Zelizer is the Lloyd Cotsen '50 Professor of Sociology at Princeton University.

April 2013. 496 pages.

New
The Emergence of Organizations and Markets
John F. Padgett & Walter W. Powell

“The scholarship, analytical focus, and sheer energy of this work are nothing short of admirable. It will change the way historians and social scientists study large-scale economic and political transformations.”
—Jon Elster, Collège de France and Columbia University

“This book revitalizes the study of social, political, and economic change by linking it to the classic sociological understanding of society as interlocked institutions that borrow from and transform one another. Its rich and subtle merger of network analysis, organization theory, and historical institutionalism will catalyze a generation of new studies. It is the essential starting point for those seeking new and exciting theoretical departures.”
—Mark Granovetter, Stanford University

John F. Padgett is professor of political science and (by courtesy) professor of sociology and history at the University of Chicago. Walter W. Powell is professor of education and (by courtesy) professor of sociology, organizational behavior, management science, communication, and public policy at Stanford University.

Social Learning
An Introduction to Mechanisms, Methods, and Models
William Hoppitt & Kevin N. Laland

“This excellent book provides a comprehensive overview of the methods and concepts used in social learning research, and also represents a rich source of information about many of the empirical findings available in the literature. It will be useful both to specialists and nonspecialists interested in social learning. I know of no other book like this.”
—Josep Call, Max Planck Institute for Evolutionary Anthropology

Many animals, including humans, acquire valuable skills and knowledge by copying others. Scientists refer to this as social learning. It is one of the most exciting and rapidly developing areas of behavioral research and sits at the interface of many academic disciplines, including biology, experimental psychology, economics, and cognitive neuroscience. Social Learning provides a comprehensive, practical guide to the research methods of this important emerging field.

William Hoppitt is senior lecturer in zoology at Anglia Ruskin University. Kevin N. Laland is professor of behavioral and evolutionary biology at the University of St. Andrews.

Forthcoming Paperback

Art of the Deal
Contemporary Art in a Global Financial Market
Noah Horowitz

“The precision and lucidity with which Mr. Horowitz describes the commercialization of art should garner appeal for his book across a broad swath of market participants. For the rest of us, it is an enjoyable glimpse into the opaque corners of the art community.”
—Benjamin R. Mandel, Journal of Cultural Economics

Noah Horowitz is a member of the faculty of Sotheby’s Institute of Art and managing director of the Armory Show.

July 2013. 384 pages. 40 halftones. 3 tables.
Pbk: 978-0-691-15788-7 $24.95 | £16.95
Ctb: 978-0-691-14832-8 $42.00 | £28.95

New

Through the Eye of a Needle
Wealth, the Fall of Rome, and the Making of Christianity in the West, 350–550 AD
Peter Brown

“Here Peter Brown listens to the heartbeat of the late Roman world. His report is a masterpiece that introduces us to the wealth and poverty of an empire as it implodes, and the inspiring Christian concept of treasure in heaven. Excavating the roots of medieval charity, he illuminates the problems of rich and poor today, and delivers a triumph of history at its finest.”
—Judith Herrin, author of Byzantium: The Surprising Life of a Medieval Empire

Peter Brown is the Philip and Beulah Rollins Professor of History Emeritus at Princeton University.

2012. 816 pages. 12 color illus. 8 halftones. 8 line illus. 4 maps.
Pbk: 978-0-691-15290-5 $39.95 | £27.95
Ctb: 978-0-691-15666-8 $19.95 | £13.95

New

The 5 Elements of Effective Thinking
Edward B. Burger & Michael Starbird

“Think … fail … question … understand … change … learn: in their powerful new book, Burger and Starbird show students, teachers, and everyone else how to harness the genius of learning.”
—Dennis Van Roekel, president of the National Education Association

Edward B. Burger is the Francis Christopher Oakley Third Century Professor of Mathematics at Williams College. Michael Starbird is University Distinguished Teaching Professor at the University of Texas at Austin.

2012. 168 pages. 1 halftone.
