LETTER FROM THE EDITOR

Princeton’s History list offers many treasures in 2014. Clearly, one of the year’s most important books is the highly anticipated English edition of Jürgen Osterhammel’s magnificent *The Transformation of the World: A Global History of the Nineteenth Century*. The *Times Literary Supplement*, which reviewed the German edition, hailed it as “a work of tremendous conceptual precision, breadth and insight, a masterpiece that sets a new benchmark for debates on the history of world society.”

For scholars interested in East European history, Yohanan Petrovsky-Shtern’s *The Golden Age Shtetl: A New History of Jewish Life in East Europe* offers a surprising new take on the Jewish market towns that were home to two-thirds of East Europe’s Jews in the eighteenth and nineteenth centuries.

Jacqueline Bhabha’s new book, *Child Migration and Human Rights in a Global Age*, is the first to integrate all aspects of child migration in a global perspective; it is at the same time an activist’s book, arguing for a compelling new international ethics of children’s human rights.

I am proud to offer an exceptionally strong crop of books in medieval and Byzantine history, with S. Frederick Starr’s *Lost Enlightenment: Central Asia’s Golden Age from the Arab Conquest to Tamerlane*; Robert Bartlett’s major history of the saints, *Why Can the Dead Do Such Great Things?: Saints and Worshippers from the Martyrs to the Reformation*; Averil Cameron’s *Byzantine Matters*; and Sverre Bagge’s *Cross and Scepter: The Rise of the Scandinavian Kingdoms from the Vikings to the Reformation*.

Finally, please take a look at Frederick Cooper’s important new book, *Citizenship between Empire and Nation: Remaking France and French Africa, 1945–1960*, which will appeal to scholars engaged in the study of empire, colonialism, citizenship, and nationhood.

I would like to thank all of you, authors and readers, for another terrific year!

The Transformation of the World
A Global History of the Nineteenth Century
Jürgen Osterhammel
Translated by Patrick Camiller

“Arguably the most important book by a German historian to be published in the past quarter century. It is a truly magisterial account of the global history of the nineteenth century, powerfully argued and beautifully rendered.”
—Sven Beckert, author of The Monied Metropolis: New York City and the Consolidation of the American Bourgeoisie, 1850–1896

A monumental history of the nineteenth century, The Transformation of the World offers a panoramic and multifaceted portrait of a world in transition. Jürgen Osterhammel, an eminent scholar who has been called the Braudel of the nineteenth century, moves beyond conventional Eurocentric and chronological accounts of the era, presenting instead a truly global history of breathtaking scope and towering erudition. He examines the powerful and complex forces that drove global change during the “long nineteenth century,” taking readers from New York to New Delhi, from the Latin American revolutions to the Taiping Rebellion, from the perils and promise of Europe’s transatlantic labor markets to the hardships endured by nomadic, tribal peoples across the planet. Osterhammel describes a world increasingly networked by the telegraph, the steamship, and the railways. He explores the changing relationship between human beings and nature, looks at the importance of cities, explains the role slavery and its abolition played in the emergence of new nations, challenges the widely held belief that the nineteenth century witnessed the triumph of the nation-state, and much more.

This is the highly anticipated English edition of the spectacularly successful and critically acclaimed German book, which is also being translated into Chinese, Polish, Russian, and French. Indispensable for any historian, The Transformation of the World sheds important new light on this momentous epoch, showing how the nineteenth century paved the way for the global catastrophes of the twentieth century, yet how it also gave rise to pacifism, liberalism, the trade union, and a host of other crucial developments.

The Essential Hirschman
Albert O. Hirschman
Edited and with an introduction by Jeremy Adelman
“An survivor of Nazi Germany, Albert Hirschman was an essential thinker—one of the very few best of the twentieth century. Wise, delightful, and full of life, he was incapable of writing a dull page. He knew what made people tick, and he knew what made societies work. This book glistens with insights, surprises, and paradoxes. Each chapter is a gem.”
—Cass R. Sunstein, coauthor of Nudge: Improving Decisions about Health, Wealth, and Happiness

The Essential Hirschman brings together some of the finest essays in the social sciences, written by one of the twentieth century’s most influential and provocative thinkers. Albert O. Hirschman was a master essayist, one who possessed the rare ability to blend the precision of economics with the elegance of literary imagination. The essays gathered here span an astonishing range of topics and perspectives, including industrialization in Latin America, imagining reform as more than repair, the relationship between imagination and leadership, routine thinking and the marketplace, and the ways our arguments affect democratic life. Throughout, we find the humor, unforgettable metaphors, brilliant analysis, and elegance of style that give Hirschman such a singular voice.

The Passions and the Interests
Political Arguments for Capitalism before Its Triumph
Albert O. Hirschman
“Hirschman’s volume stands as a principal contribution to the growing literature that is beginning to reshape our understanding of the legitimating beliefs undergirding the rise of the modern market economy.”
—Robert Wuthnow, American Journal of Sociology

Albert Hirschman here reconstructs the intellectual climate of the seventeenth and eighteenth centuries to show how the pursuit of material interests—so long condemned as the deadly sin of avarice—was assigned the role of containing the unruly and destructive passions of man. Hirschman offers a novel interpretation of the rise of capitalism, one that emphasizes the continuities between old and new, in contrast to the notion of a sharp break that is common to both Marxian and Weberian thinking.

The Golden Age Shtetl
A New History of Jewish Life in East Europe
Yohanan Petrovsky-Shtern

“An inspiring and rich study. In this highly innovative book, Petrovsky-Shtern demonstrates how the shtetl in early nineteenth-century Russia constituted a unique context for the unfolding of a proud, resilient, and sustainable Jewish community.”
—François Guesnet, University College London

The shtetl was home to two-thirds of East Europe’s Jews in the eighteenth and nineteenth centuries, yet it has long been one of the most neglected and misunderstood chapters of the Jewish experience. This book provides the first grassroots social, economic, and cultural history of the shtetl. Challenging popular misconceptions of the shtetl as an isolated, ramshackle Jewish village stricken by poverty and pogroms, Yohanan Petrovsky-Shtern argues that, in its heyday from the 1790s to the 1840s, the shtetl was a thriving Jewish community as vibrant as any in Europe.

Lost Enlightenment
Central Asia’s Golden Age from the Arab Conquest to Tamerlane
S. Frederick Starr

“From 800 to 1200, Central Asia was the world’s most advanced civilization in the sciences, mathematics, medicine, law, and art. Starr’s Lost Enlightenment thoughtfully explains this astonishing evolution and its end.”
—Henry A. Kissinger

“Lost Enlightenment brilliantly re-creates for us the world of Central Asia, which for centuries was not a backwater but a center of world civilization. With a sure mastery of the large historical sweep as well as an eye for detail, Fred Starr has written an important book that will be a resource for years to come.”
—Francis Fukuyama, author of The Origins of Political Order

In this sweeping and richly illustrated history, S. Frederick Starr tells the fascinating but largely unknown story of Central Asia’s medieval enlightenment through the eventful lives and astonishing accomplishments of its greatest minds—remarkable figures who built a bridge to the modern world. Because nearly all of these figures wrote in Arabic, they were long assumed to have been Arabs. In fact, they were from Central Asia—drawn from the Persianate and Turkic peoples of a region that today extends from Kazakhstan southward through Afghanistan, and from the easternmost province of Iran through Xinjiang, China.

The Confidence Trap
A History of Democracy in Crisis from World War I to the Present
David Runciman

“The Confidence Trap’s engrossing analytical history illuminates democracy’s deepening achievements and recurring crises during the charged past century. By incisively interpreting these moments of unsettled apprehension and by tracking patterns of coping and surviving, this rich, important book helps us understand, and perhaps even navigate, present anxieties about the capacity of democracies to grapple with the big issues of economics, geopolitics, and the environment.”
—Ira Katznelson, author of Fear Itself: The New Deal and the Origins of Our Time

The Confidence Trap shows that democracies are good at recovering from emergencies but bad at avoiding them. The lesson democracies tend to learn from their mistakes is that they can survive them—and that no crisis is as bad as it seems. Breeding complacency rather than wisdom, crises lead to the dangerous belief that democracies can muddle through anything—a confidence trap that may lead to a crisis that is just too big to escape, if it hasn’t already. The most serious challenges confronting democracy today are debt, the war on terror, the rise of China, and climate change. If democracy is to survive them, it must figure out a way to break the confidence trap.

Liberalism
The Life of an Idea
Edmund Fawcett

“Elegant, fluently written, and wryly amusing, this enlightening history of liberalism tells a persuasive story of ideas and politics through the lives of a huge variety of characters. The result is tremendously enjoyable.”
—Duncan Kelly, author of The Propriety of Liberty

Liberalism dominates today’s politics just as it decisively shaped the past two hundred years of American and European history. Yet there is striking disagreement about what liberalism really means and how it arose. In this engrossing history of liberalism—the first in English for many decades—veteran political observer Edmund Fawcett traces the ideals, successes, and failures of this central political tradition through the lives and ideas of a rich cast of European and American thinkers and politicians, from the early nineteenth century to today.

An enlightening account of a vulnerable but critically important political creed, Liberalism will be a revelation for readers who think they already know—for good or ill—what liberalism is.

Citizenship between Empire and Nation
Frederick Cooper

“With its exhaustive research, clear and persuasive argument, and boldly original questions, this book is nothing short of magisterial. It is quite simply the best comprehensive study that I have read regarding the final stages of France’s empire in Africa. There is nothing like it in depth, scope, or analytical acuity.”
—Alice L. Conklin, Ohio State University

“This is the first book to provide a much-needed exploration of the time and space in between empire and postcolony in sub-Saharan Francophone Africa. Cooper expertly navigates between African and French perspectives, bringing to life the negotiations over the future of Africa. Timely and significant, this excellent, wide-ranging, and original book uses dazzling research to elaborate a completely new and compelling argument.”
—Eric Jennings, University of Toronto

As the French public debates its present diversity and its colonial past, few remember that between 1946 and 1960 the inhabitants of French colonies possessed the rights of French citizens. Moreover, they did not have to conform to the French civil code that regulated marriage and inheritance. One could, in principle, be a citizen and different too. Citizenship between Empire and Nation examines momentous changes in notions of citizenship, sovereignty, nation, state, and empire in a time of acute uncertainty about the future of a world that had earlier been divided into colonial empires.

Ancient Religions, Modern Politics
The Islamic Case in Comparative Perspective
Michael Cook

“Ancient Religions, Modern Politics is at once painstaking and panoramic. It draws on a lifetime of learning and erudition, yet is audacious in its willingness to pose—and answer—bold questions. Rich in its use of sources and convincing in its arguments, this book will be widely read and very influential.”
—Andrew F. March, author of Islam and Liberal Citizenship

Why does Islam play a larger role in contemporary politics than other religions? Is there something about the Islamic heritage that makes Muslims more likely than adherents of other faiths to invoke it in their political life? If so, what is it? Ancient Religions, Modern Politics seeks to answer these questions by examining the roles of Islam, Hinduism, and Christianity in modern political life, placing special emphasis on the relevance—or irrelevance—of their heritages to today’s social and political concerns.

Michael Cook takes an in-depth, comparative look at political identity, social values, attitudes to warfare, views about the role of religion in various cultural domains, and conceptions of the polity. In all these fields he finds that the Islamic heritage offers richer resources for those engaged in current politics than either the Hindu or the Christian heritages. He uses this finding to explain the fact that, despite the existence of Hindu and Christian counterparts to some aspects of Islamism, the phenomenon as a whole is unique in the world today.

Empires in World History
Power and the Politics of Difference
Jane Burbank & Frederick Cooper

“This is the single best book about the relationship of empires and nations that I can think of.”
—Kenneth Pomeranz, author of The Great Divergence

“A major corrective to much of the literature about empire, this is destined to become a classic…. The coverage is sweeping and balanced. A stunning accomplishment.”

Empires in World History departs from conventional European and nation-centered perspectives to take a remarkable look at how empires relied on diversity to shape the global order. Beginning with ancient Rome and China and continuing across Asia, Europe, the Americas, and Africa, Jane Burbank and Frederick Cooper examine empires’ conquests, rivalries, and strategies of domination, emphasizing how empires accommodated, created, and manipulated differences among populations.

Cultures in Motion
Edited by Daniel T. Rodgers, Bhavani Raman & Helmut Reimitz

“This successful collection of essays focuses on the inherent instability of cultural spheres and the increasing recognition that traditional models of comparative, global, and transcultural/transnational investigation do not do justice to the complexities of human history. Cultures in Motion defines the contours of a new way of thinking and researching cultural history.”
—Patrick J. Geary, Institute for Advanced Study

In the wide-ranging and innovative essays of Cultures in Motion, a dozen distinguished historians offer new conceptual vocabularies for understanding how cultures have trespassed across geography and social space. From the transformations of the meanings and practices of charity during late antiquity and the transit of medical knowledge between early modern China and Europe, to the fusion of Irish and African dance forms in early nineteenth-century New York, these essays follow a wide array of cultural practices through the lens of motion, translation, itinerancy, and exchange, extending the insights of transnational and translocal history.

Jews and the Military
A History
Derek J. Penslar

“This book shatters the conventional image of diaspora Jews as a people who shun warfare. With exemplary scholarship and a gimlet eye for telling historical evidence, Derek Penslar analyzes Jewish participation in armies from the seventeenth century to the present. Wide-ranging in its scope, original in its argument, and elegant in its presentation, this is the work of a master historian at the peak of his powers.”
—Bernard Wasserstein, author of On the Eve: The Jews of Europe Before the Second World War

“Derek Penslar’s Jews and the Military reminds us of the importance of great historians. It has been a common belief, especially in Israel, that diaspora Jews before the advent of political Zionism lacked the will to fight. Penslar shows us, in his astute and meticulous way, that Jews not only fought, but also had the courage to do so while struggling with hybrid, sometimes clashing identities. An illuminating book.”

Muslims and Jews in France
History of a Conflict
Maud S. Mandel

“Mandel reveals how the conventional opposition between Muslim and Jew has obscured a more complex pattern of interethnic relations in France. At the same time, she demonstrates that the language of ethnic and religious discord has itself had a powerful impact on Muslims and Jews alike. In a study that combines sophistication with clarity, Mandel provides a compelling historical account of an issue that continues to shape the present.”
—David Feldman, Birkbeck, University of London

This book traces the global, national, and local origins of the conflict between Muslims and Jews in France, challenging the belief that rising anti-Semitism in France is rooted solely in the unfolding crisis in Israel and Palestine. Maud Mandel shows how the conflict in fact emerged from processes internal to French society itself even as it was shaped by affairs elsewhere, particularly in North Africa during the era of decolonization.

Weimar Thought
A Contested Legacy
Edited by Peter E. Gordon & John P. McCormick

“This is the first work in a generation that presents a comprehensive overview of Weimar culture with all its complexity and contradictions. It successfully shows continuities and discontinuities with the past, and tensions that resist reduction. The book’s reach—from theology to the biological sciences, and literary criticism to legal theory—goes far beyond any other volume I am aware of on the same subject.”
—Peter Carl Caldwell, Rice University

During its short lifespan, the Weimar Republic (1918–33) witnessed an unprecedented flowering of achievements in many areas, including psychology, political theory, physics, philosophy, literary and cultural criticism, and the arts. Leading intellectuals, scholars, and critics—such as Hannah Arendt, Walter Benjamin, Ernst Bloch, Bertolt Brecht, and Martin Heidegger—emerged during this time to become the foremost thinkers of the twentieth century. Even today, the Weimar era remains a vital resource for new intellectual movements. In this incomparable collection, Weimar Thought presents both the specialist and the general reader a comprehensive guide and unified portrait of the most important innovators, themes, and trends of this fascinating period.

With a foreword by Raymond Geuss
Secret Reports on Nazi Germany
The Frankfurt School Contribution to the War Effort
Franz Neumann, Herbert Marcuse & Otto Kirchheimer
Edited by Raffaele Laudani

“This collection brings alive with exceptional force the real politics behind critical theory. It highlights the range and sophistication of a vast array of intelligence reports about the structures of power and domination under National Socialist rule, compiled through the teamwork of Franz Neumann, Herbert Marcuse, and Otto Kirchheimer. Their cool objectivity is remarkable, and reminds us just how indebted we remain to their pioneering work.”
—Duncan Kelly, University of Cambridge

During the Second World War, three prominent members of the Frankfurt School—Franz Neumann, Herbert Marcuse, and Otto Kirchheimer—worked as intelligence analysts for the Office of Strategic Services, the wartime forerunner of the CIA. This book brings together their most important intelligence reports on Nazi Germany, most of them published here for the first time.

Secret Reports on Nazi Germany features a foreword by Raymond Geuss as well as a comprehensive general introduction by Raffaele Laudani that puts these writings in historical and intellectual context.

Redeeming The Prince
The Meaning of Machiavelli’s Masterpiece
Maurizio Viroli

“Religion and liberty, each often considered the main enemy of the other, stand together in Maurizio Viroli’s thoughtful and daring book. Writing with his usual convincing charm, Viroli studies three highlights of Italian republicanism and finds a common clue to their fame in the formula ‘as if God existed’: A must for lovers of Machiavelli—and Italy.”
—Harvey C. Mansfield, author of Machiavelli’s Virtue

In Redeeming “The Prince,” one of the world’s leading Machiavelli scholars puts forth a startling new interpretation of arguably the most influential but widely misunderstood book in the Western political tradition.

Lobbying America
The Politics of Business from Nixon to NAFTA
Benjamin C. Waterhouse

“Lobbying America explores the fractious history of business influence over American politics and brilliantly charts the business establishment’s post-1970 counteroffensive against what its leaders saw as oppressive taxation, regulatory overreach, and an arrogant union movement. Attuned to the political successes and failures of organized business, Waterhouse has produced a must-read for anyone who wishes to understand the United States’ late twentieth-century embrace of free market ideology.”

—Edward Balleisen, Duke University

“In crisp, lucid prose, Waterhouse makes a convincing case for the success of pro-business mobilization during the 1970s and 80s. Waterhouse shows corporate lobbyists reacting to and learning from their opponents in the environmental, consumer, and labor movements, and ultimately leveraging economic upheavals to split those forces and control the terms of debate, if not always the outcomes. This go-to book integrates a lively archival account into the larger narrative of conservative counterrevolution.”

On the Muslim Question
Anne Norton

“This is an extraordinary book—an impassioned, astute, and erudite critique that strongly refutes the ‘clash of civilizations’ rhetoric and the stereotypes shaping contemporary discussions of Muslims in the West. It further proposes a concrete alternative vision of democracy in diverse societies. The argument is original and sophisticated and the writing is beautiful—graceful, assertive, and clear.”
—Joan W. Scott, Institute for Advanced Study

“This is a crisp and bracing snapshot of the ways in which the so-called Muslim problem serves as a repository for a host of Euro-American anxieties, fears, and doubts rather than as an accurate reflection of Islam or the behavior of actual Muslims. One of the great strengths of the book is how it joins a wonderfully eclectic journey through politics, film, scholarship, clothing, fiction, and language with an attention to the different ways the United States and Europe formulate and respond to ‘the Muslim problem.’”
—Roxanne Euben, Wellesley College

The Politics of the Veil
Joan Wallach Scott

“This book is a powerful denunciation of the French government and people whom Scott labels as racist, discriminatory, and intolerant of Muslim immigrants primarily from North Africa…. [A] fascinating piece of scholarship.”

The Visioneers
How a Group of Elite Scientists Pursued Space Colonies, Nanotechnologies, and a Limitless Future
W. Patrick McCray

“In this compulsively readable history, Patrick McCray tells the remarkable, intertwined story of the ‘visioneers,’ improbable dreamers whose aspirations for a transformative future surprisingly helped create the world of today. His American panorama sweeps us from the malaise of the 1970s through the go-go 1980s and the technocratic 1990s. We end up in our present, richer for the journey.”
—Michael Gordin, Princeton University

“The Visioneers is an enthralling tale of visionaries fighting against the gravity of habit and convention, cajoling the rest of us to create a new and better future. It is at once compelling history and a reminder that if one aims high and far enough, even failures can lead to unintended society-changing successes.”
