The Medea Hypothesis
Is Life on Earth Ultimately Self-Destructive?
Peter Ward

“The Medea Hypothesis is provocative, extremely well-written, and very convincing.”
—Simon A. Levin, Princeton University

Renowned paleontologist Peter Ward proposes a revolutionary and provocative vision of life’s relationship with the Earth’s biosphere. Using the latest discoveries from the geological record, he argues that life might be its own worst enemy.

Peter Ward is professor of biology and earth and space sciences at the University of Washington, and an astrobiologist with NASA.

**The Long Thaw**
How Humans Are Changing the Next 100,000 Years of Earth’s Climate

David Archer

“This is the best book about carbon dioxide and climate change that I have read. David Archer knows what he is talking about.”

—James Hansen, director of the NASA Goddard Institute for Space Studies

Revealing why carbon dioxide may be an even worse gamble in the long run than in the short, this compelling and critically important book brings the best long-term climate science to a general audience.

David Archer is professor of geophysical sciences at the University of Chicago.

**Descartes’s Changing Mind**  
Peter Machamer & J. E. McGuire

Descartes’s works are often treated as a unified, unchanging whole. But in *Descartes’s Changing Mind*, Peter Machamer and J. E. McGuire argue that the philosopher’s views, particularly in natural philosophy, actually change radically between his early and later works—and that any interpretation of Descartes must take account of these changes. The first comprehensive study of the most significant of these shifts, this book also provides a new picture of the development of Cartesian science, epistemology, and metaphysics.

Peter Machamer is professor of history and philosophy of science and associate director of the Center for Philosophy of Science at the University of Pittsburgh. J. E. McGuire is professor of history and philosophy of science at the University of Pittsburgh, and a resident fellow of the Center for Philosophy of Science.

**Mind and Nature**  
Selected Writings on Philosophy, Mathematics, and Physics  
Hermann Weyl

Edited by Peter Pesic

“Hermann Weyl ranks among the greatest mathematicians, and his deep contributions to physics were decades ahead of their time. But to know him only through his science is to miss the soul of a seeker. For Weyl, the experienced world in all its aspects was an inexhaustible source of wonder and inspiration. Here you can share in the life adventure of a beautiful mind.”  
—Frank Wilczek, Nobel Prize–winning physicist

Peter Pesic is Tutor and Musician-in-Residence at St. John’s College in Santa Fe, New Mexico.

**Cl:** 978-0-691-14120-6  $35.00 | £19.95

Also by Hermann Weyl

**Philosophy of Mathematics and Natural Science**

When mathematician Hermann Weyl decided to write a book on philosophy, he faced what he referred to as “conflicts of conscience”—the objective nature of science, he felt, did not mesh easily with the incredulous, uncertain nature of philosophy. Yet the two disciplines were already intertwined. In *Philosophy of Mathematics and Natural Science*, Weyl examines how advances in philosophy were led by scientific discoveries—the more humankind understood about the physical world, the more curious we became.

Mathematicians Fleeing from Nazi Germany
Individual Fates and Global Impact
Reinhard Siegmund-Schultze

“This is an excellent book.” —Karen Parshall, University of Virginia

The emigration of mathematicians from Europe during the Nazi era signaled an irrevocable and important historical shift for the international mathematics world. In this greatly expanded translation of the 1998 German edition, Reinhard Siegmund-Schultze describes the flight of more than 140 mathematicians, their reasons for leaving, the political and economic issues involved, the reception of these emigrants by various countries, and the emigrants’ continuing contributions to mathematics.

Reinhard Siegmund-Schultze is professor of the history of mathematics at the University of Agder, Kristiansand in Norway.

July 2009. 456 pages. 59 halftones. 3 tables.

When Experiments Travel
Clinical Trials and the Global Search for Human Subjects
Adriana Petryna

“This superb book provides the best overview of the pharmaceutical industry’s rush to move clinical trials to developing countries, and the intensely troubling moral, political, economic, and cultural issues this effort raises. Petryna’s argument is balanced and compelling, and her case studies are riveting.”

—Arthur Kleinman, M.D., Harvard University

Adriana Petryna is associate professor of anthropology at the University of Pennsylvania.

New

The Faith of Scientists
In Their Own Words
Edited by Nancy K. Frankenberry

“Nancy Frankenberry provides a rare glimpse into the interior lives of scientists as they talk about their faith, their views about God, and spirituality. From Galileo to Ursula Goodenough, she shows critical acumen in selecting the source material and authoritative scholarship in interpreting it. This book offers an unsurpassed treatment of a vital subject.”

—Max Jammer, author of Einstein and Religion

Nancy K. Frankenberry is the John Phillips Professor of Religion at Dartmouth College.

New

Trusting Doctors
The Decline of Moral Authority in American Medicine
Jonathan B. Imber

“Jonathan Imber’s Trusting Doctors is an important, interesting, and readable book. We all know that our modern doctors do not have the social aura they once did. Imber effectively tells us the eye-opening story of why that change has happened.”

—Daniel Callahan, cofounder of the Hastings Center

Jonathan B. Imber is the Class of 1949 Professor in Ethics and professor of sociology at Wellesley College.

Margaret Mead
The Making of an American Icon
Nancy C. Lutkehaus

“This is an absorbing, expertly researched, and much-needed treatment of Margaret Mead.”

—George E. Marcus, University of California, Irvine

In this insightful and revealing book, Nancy Lutkehaus explains how and why Margaret Mead became the best-known anthropologist and female public intellectual in twentieth-century America.

Nancy C. Lutkehaus is professor and chair of the Department of Anthropology at the University of Southern California.

An Intellectual History of Cannibalism
Cătălin Avramescu
Translated by Alistair Ian Blyth

“In this brilliant book, Cătălin Avramescu reexamines the Western tradition of social and political thought, restoring our obsession with cannibalism to its proper place in the European imagination. His erudition is overwhelming as he traces the figure of the cannibal, both fascinating and horrifying, through the period when the modern world was being born. Avramescu shows us our history and ourselves in a completely original and gripping way. An Intellectual History of Cannibalism is a real tour de force.”

—Daniel Garber, Princeton University

Cătălin Avramescu is assistant professor of political science at the University of Bucharest.

May 2009. 360 pages. 8 halftones. Cl: 978-0-691-13327-0 $29.95 | £17.95

With a foreword by Freeman Dyson

**Gamma**
Exploring Euler’s Constant

Julian Havil

“[A] wonderful book…. **Gamma** is a gold mine of irresistible mathematical nuggets. Anyone with a serious interest in maths will find it richly rewarding.”

—Ben Longstaff, *New Scientist*

Julian Havil is a former master at Winchester College, England, where he taught mathematics for thirty-three years.

Princeton Science Library
July 2009. 304 pages.
Pa: 978-0-691-14133-6 $17.95 | £10.95
Cl: 978-0-691-09983-5 $29.95 | £17.95

Forthcoming Paperback

**e**
The Story of a Number

Eli Maor

“Maor hangs his story on a string of people stretching from Archimedes to David Hilbert. And by presenting mathematics in terms of the humans who produced it, he places the subject where it belongs—squarely in the centre of the humanities.”

—Jerry P. King, *Nature*

Eli Maor teaches the history of mathematics at Loyola University in Chicago and at the Graham School of General Education at the University of Chicago.

Princeton Science Library
March 2009. 248 pages. 6 halftones. 74 line illus.
Pa: 978-0-691-14134-3 $15.95 | £9.50
Cl: 978-0-691-09985-9 $29.95 | £17.95

New Paperback
One of Choice’s Outstanding Academic Titles for 2005

**The Calculus Gallery**
Masterpieces from Newton to Lebesgue

William Dunham

“The Calculus Gallery is a wonderful book. The style is inviting; the explanations are clear and accessible…. Mathematicians, scientists, and historians alike can learn much that is interesting, much that is mathematically significant, and a good deal that is both.”

—Judith V. Grabiner, *Science*

William Dunham is Koehler Professor of Mathematics at Muhlenberg College.

2008. 256 pages. 19 halftones. 44 line illus.
Pa: 978-0-691-13871-8 $19.95 | £11.95
Cl: 978-0-691-09565-3 $39.95 | £23.95

New Paperback

**Fearless Symmetry**
Exposing the Hidden Patterns of Numbers

Avner Ash & Robert Gross

“The authors are to be admired for taking a very difficult topic and making it … more accessible than it was before.”

—Timothy Gowers, *Nature*

Avner Ash is professor of mathematics at Boston College. Robert Gross is associate professor of mathematics at Boston College.

2008. 312 pages. 1 halftone. 2 line illus.
Pa: 978-0-691-13871-8 $18.95 | £11.50
Cl: 978-0-691-12492-6 $24.95 | £14.95

Einstein for the 21st Century
His Legacy in Science, Art, and Modern Culture
Edited by Peter L. Galison, Gerald Holton & Silvan S. Schweber

“This lovely compendium of essays on Einstein’s cultural impact is as stunning in its breadth as Einstein was in his science…. Browsing through this book is like eavesdropping on the reminiscences of great artists, novelists, historians, and scientists as they discuss their favorite old teachers. How remarkable, then, that they are all discussing the same man.”
—Seed Magazine

Peter L. Galison is the Pellegrino University Professor of the History of Science and of Physics at Harvard University. Gerald Holton is the Mallinckrodt Research Professor of Physics and Research Professor of the History of Science at Harvard. Silvan S. Schweber is professor emeritus of physics and the Richard Koret Professor in the History of Ideas at Brandeis University.

Traveling at the Speed of Thought
Einstein and the Quest for Gravitational Waves
Daniel Kennefick

“Traveling at the Speed of Thought … tells the fascinating story of how gravitational-wave theory, which was a hive of controversy for many years, eventually became a dead certainty.”
—Bernard Schutz, American Scientist

Forthcoming Paperback

It’s About Time
Understanding Einstein’s Relativity
N. David Mermin

“One of Choice’s Outstanding Academic Titles for 2007

Einstein on Politics
His Private Thoughts and Public Stands on Nationalism, Zionism, War, Peace, and the Bomb
Edited by David E. Rowe & Robert Schulmann

“A goldmine for readers interested in Einstein as an engaged intellectual of his era. Editors David E. Rowe and Robert Schulmann have done an excellent job of collecting, thematically assembling and historically contextualizing Einstein’s private letters and public statements on the great political issues of his time.”
—Yaron Ezrahi, Nature

2007. 576 pages. 24 halftones. Cl: 978-0-691-12094-2 $29.95 | £17.95

The Collected Papers of Albert Einstein

The Collected Papers of Albert Einstein is one of the most ambitious publishing ventures ever undertaken in the documentation of the history of science. Selected from among more than 40,000 documents contained in the personal collection of Albert Einstein (1879-1955), and 15,000 Einstein and Einstein-related documents discovered by the editors since the beginning of the Einstein Project, The Collected Papers will provide the first complete picture of a massive written legacy that ranges from Einstein's first work on the special and general theories of relativity and the origins of quantum theory, to expressions of his profound concern with civil liberties, education, Zionism, pacifism, and disarmament. The series will contain over 14,000 documents and will fill twenty-five volumes.

After Volume 1, the papers divide into two series, with the documents in each volume presented in chronological order. One series, the Writings, will include such items as Einstein's published and unpublished articles, lecture and research notebooks, book reviews, patent applications, and available accounts of his lectures, speeches, interviews, and other oral statements. The other series, the Correspondence, will include a wide selection of letters written by and to Einstein, as well as significant documents about him by third parties.

Every document in The Collected Papers will appear in the language in which it was written, while the introduction, headnotes, footnotes, and other scholarly apparatus will be in English. Upon release of each volume, Princeton University Press will also publish an English translation of previously untranslated non-English documents.

There is a 10% subscription discount for this series for customers in the U.S. and Canada.
In this latest volume, Einstein's visible public persona is amply documented in his correspondence and articles. Einstein agrees to help a Zionist fund raising mission and he visits the United States for the first time. While there, he delivers his now famous Princeton Lectures. Correspondence with N. Bohr, W. Bothe, P. Ehrenfest, H. Geiger, H. A. Lorentz, L. Meitner, and A. Sommerfeld records Einstein's interest in and contributions to the emerging modern quantum theory.

Throughout the year, Einstein navigates complex territory in his professional and personal life. He supports the nomination of Masaryk for a Nobel Peace Prize, intervenes on behalf of Germany at the Paris reparations conference in Amsterdam, and assists Russian physicists in their efforts to rebuild and develop Russian science.

At the California Institute of Technology, Diana Kormos Buchwald is professor of history; Tilman Sauer is senior research associate in history; and József Illy, Virginia Iris Holmes, and Ze'ev Rosenkranz are research staff in history.

June 2009. 720 pages. 24 halftones.

Winner of the 2007 Isabelle Hermalyn Book Award, Bronx County Historical Society
Winner of the 2007 New York City Book Award, New York Society Library

**Trying Leviathan**
The Nineteenth-Century New York Court Case That Put the Whale on Trial and Challenged the Order of Nature
D. Graham Burnett

“Mr. Burnett brilliant deconstructs the [Maurice v. Judd] controversy.”
—Glenn C. Altschuler, *New York Observer*

2007. 304 pages. 16 color plates. 19 halftones.
Cl: 978-0-691-12950-1 $29.95 | £17.95

**Five Days in August**
How World War II Became a Nuclear War
Michael D. Gordin

“Gordin has done an excellent job in surveying the diverse views on what happened during those momentous five days in August 1945.”
—John Kriege, *Science*

2006. 232 pages. 2 halftones. 5 maps.
Cl: 978-0-691-12818-4 $24.95 | £14.95

One of Choice’s Outstanding Academic Titles for 2007

**Power, Speed, and Form**
Engineers and the Making of the Twentieth Century
David P. Billington & David P. Billington Jr.

 “[A]n extraordinary volume.”
—Samuel C. Florman, *Technology and Culture*

2006. 296 pages. 77 halftones. 75 line illus.
Cl: 978-0-691-10292-4 $29.95 | £17.95

**On Physics and Philosophy**
Bernard d’Espagnat

“For all collections on the philosophy of science…. Highly recommended.”
—Choice

2006. 520 pages. 3 line illus.
Cl: 978-0-691-11964-9 $35.00 | £19.95

**All Creatures**
Naturalists, Collectors, and Biodiversity, 1850–1950
Robert E. Kohler

“[A] fascinating and groundbreaking book.”
—Tim Dee, *Times Literary Supplement*

2006. 380 pages. 55 halftones. 1 table.
Cl: 978-0-691-12539-8 $37.50 | £22.50
