THE DIGITAL EINSTEIN PAPERS

The Digital Einstein Papers is an exciting new free, open-access website that puts The Collected Papers of Albert Einstein online for the very first time, bringing the writings of the twentieth century's most influential scientist to a wider audience than ever before. This unique, authoritative resource provides full public access to the complete transcribed, annotated, and translated contents of each print volume of The Collected Papers. The volumes are published by Princeton University Press, sponsored by the Hebrew University of Jerusalem, and supported by the California Institute of Technology. The website—einsteinpapers.press.princeton.edu—currently contains the contents of Volumes 1–14 of The Collected Papers, covering the first forty-six years of Einstein's life, up to and including the years immediately before the final formulation of new quantum mechanics. The contents of each new volume will be added to the website approximately eighteen months after print publication. Eventually, the website will provide access to all of Einstein's writings and correspondence accompanied by scholarly annotation and apparatus, which are expected to fill thirty volumes.
