The Silent Sex
Gender, Deliberation, and Institutions
Christopher F. Karpowitz & Tali Mendelberg

“*The Silent Sex* offers a powerful and relentless analysis of the silencing of women in decision making. Karpowitz and Mendelberg show over and over—with well-crafted experiments, observational data, and deep analysis—how majority-rule institutions silence all women who find themselves in the minority regardless of expertise and experience.”

—Nancy Burns, University of Michigan

“The Silent Sex explores the gender imbalance in deliberative participation, a pervasive problem in politics and social interaction. Karpowitz and Mendelberg bring together an unusually rich combination of clear theorizing, deep background in several social science disciplines, convincing empirical research, and thought-provoking policy recommendations.”

—Nannerl O. Keohane, former president of Duke University and Wellesley College

Bringing clarity and insight to one of today’s most contentious debates, *The Silent Sex* provides important new findings on ways to bring women’s voices into the conversation on matters of common concern.

Currency Politics
The Political Economy of Exchange Rate Policy
Jeffry A. Frieden

“This excellent book is for anyone who has ever wondered about the origins of the Eurozone, the causes of the currency crises, and the importance of the classical gold standard. Frieden combines lively historical narratives with statistical analyses to show that currency politics are pretty much the same across time and space. No other author could bring out the common threads running through the book’s cases so clearly.”

—J. Lawrence Broz, University of San Diego

“Currency Politics is an ambitious book on an important topic. Frieden is one of the best political economists and one of the best scholars writing on this subject.”

—Sebastian Edwards, University of California, Los Angeles and author of *Toxic Aid*

The exchange rate is the most important price in any economy, since it affects all other prices. Exchange rates are set, either directly or indirectly, by government policy. Exchange rates are also central to the global economy, for they profoundly influence all international economic activity. Despite the critical role of exchange rate policy, there are few definitive explanations of why governments choose the currency policies they do. Filled with in-depth cases and examples, *Currency Politics* presents a comprehensive analysis of the politics surrounding exchange rates.

Caught
The Prison State and the Lockdown of American Politics
Marie Gottschalk

—Mary Fainsod Katzenstein, Cornell University

“This is the most comprehensive, synthetic, and compelling account of what is driving penal trends in America today. For contemporary scholars and activists, Caught is certain to become a common starting point for future debates about what direction policy reform and social activism should take.”

Why Our Economic Fears Lead to Political Inaction
Adam Seth Levine

“Developing a groundbreaking theory about the difficulties of collective action in American politics, this book considers how interest groups, public political participation, and the responsiveness of elected officials play a role in the distinct lack of policies aimed at ameliorating the effects of economic insecurity in the United States. The Impression of Influence
Legislator Communication, Representation, and Democratic Accountability
Justin Grimmer, Sean J. Westwood & Solomon Messing

This is the most convincing and interesting work about the credit-claiming front that has appeared in a long time.”

Paradoxes of Liberal Democracy
Islam, Western Europe, and the Danish Cartoon Crisis
Paul M. Sniderman, Michael Bang Petersen, Rune Slothuus & Rune Stubager
“Taking its starting point from the infamous Danish cartoon crisis and the clash of democratic values and Muslim fundamentalism that followed, this engagingly written, methodologically sophisticated, and creative study of public opinion adds substantially to a growing body of research into this ‘clash of civilizations.’ . . . This superb analysis of the nuances of public morality convincingly eschews simple answers to important and complex questions.”
—Geoffrey Evans, University of Oxford
“The paradox of liberal democracy is that, at the height of the Danish cartoon controversy, the Danes did not launch a broadside attack against the civil liberties of their Muslim minority. The pages of this book bring that paradox alive with compelling theoretical and methodological arguments. This is a splendid work of scholarship.”

The NSA Report
Liberty and Security in a Changing World
The President’s Review Group on Intelligence and Communications Technologies
Richard A. Clarke, Michael J. Morell, Geoffrey R. Stone, Cass R. Sunstein & Peter Swire
“The report is a brilliantly readable guide to the world [Edward] Snowden revealed; its clarity of analysis, proceeding from fundamental principles, impeccable. . . . Governments around the world would do well to reflect on the principles that underpin The NSA Report and relate them to their own intelligence-gathering activities.”
—Kieron O’Hara and Nigel Shadbolt, Science
This is the official report that is helping shape the international debate about the unprecedented surveillance activities of the National Security Agency. Commissioned by President Obama following disclosures by former NSA contractor Edward J. Snowden, and written by a preeminent group of intelligence and legal experts, the report examines the extent of NSA programs and calls for dozens of urgent and practical reforms. The result is a blueprint showing how the government can reaffirm its commitment to privacy and civil liberties—without compromising national security.

Political Bubbles
Financial Crises and the Failure of American Democracy
Nolan McCarty, Keith T. Poole & Howard Rosenthal
“McCarty, Poole, and Rosenthal have crafted a masterful analysis of the 2008 financial crisis. Their central thesis is that the underlying cause of the Great Recession was the ‘political bubble’… The warnings for the U.S. political system are dire, and the authors make the case for political courage in dealing with wealth inequalities. This book would be an excellent addition to the library of any student of political economy and an excellent start in generating policy proposals on how to deal with future crises.”

The Age of Garvey
How a Jamaican Activist Created a Mass Movement and Changed Global Black Politics
Adam Ewing

“The Age of Garvey takes a movement remembered as rigid and fleeting and brilliantly demonstrates its flexibility and longevity. The first to map Garvey’s sweeping influence on three continents, this book captures how Garveyism functioned less as an ideology than as a method of organizing, making black diasporic consciousness both possible and desirable.”
—N. D. B. Connolly, author of A World More Concrete

“At last, an account of Garveyism worthy of its historic influence. Taking a unique approach to the twentieth century’s first black power movement, Ewing shows how Garveyism became a dynamic force in the politics of the interwar years. His superlative book bridges the genres of intellectual, social, and cultural history to serve as a model for the study of transnationalism.”

A Mathematics Course for Political and Social Research
Will H. Moore & David A. Siegel

Political science and sociology increasingly rely on mathematical modeling and sophisticated data analysis, and many graduate programs in these fields now require students to take a “math camp” or a semester-long or yearlong course to acquire the necessary skills. Available textbooks are written for mathematics or economics majors, and fail to convey to students of political science and sociology the reasons for learning often-abstract mathematical concepts. A Mathematics Course for Political and Social Research fills this gap, providing both a primer for math novices in the social sciences and a handy reference for seasoned researchers.

This book, based on more than a decade of personal experience by a foremost practitioner and a wealth of knowledge gathered over the years by researchers at J-PAL, provides both comfort and guidance to anyone seeking to engage in this process.”

Why Americans Don’t Join the Party
Race, Immigration, and the Failure (of Political Parties) to Engage the Electorate
Zoltan L. Hajnal & Taeku Lee

“A critical and long-overdue intervention in the study of contemporary American politics, Why Americans Don’t Join the Party provides a thorough revision of theories of partisanship. Hajnal and Lee brilliantly explain how the many different groups comprising today’s complicated racial and ethnic terrain form attachments, or not, to the major political parties, and the authors show how these attachments are shaped by the legacy of slavery, immigrant political incorporation, and racial identities and ideologies. This book will be required reading for all who are interested in the future of American politics.”

In the Interest of Others
Organizations and Social Activism

John S. Ahlquist & Margaret Levi

“Why do the members of some trade unions sacrifice time and money to support the causes of others halfway around the world? Ahlquist and Levi provide a convincing answer: founders who build organizations that deliver good jobs to members may also build organizations that transform members’ values to support international solidarity. This outstanding book is a must-read for scholars of organizational and political sociology, collective action, and behavioral economics.”

Of Empires and Citizens
Pro-American Democracy or No Democracy at All?

Amaney A. Jamal

“Contrasting the prospects for democratization in Jordan and Kuwait, Jamal argues that Jordanians prefer a stable monarchy to a democracy dominated by anti-American Islamists because they fear that the US would punish Jordan economically if Islamists won elections. . . . [O]f Empires and Citizens makes a nice addition to the comparative politics literature by emphasizing how geostrategic relations shape state-society negotiations over political change . . . . [R]eaders will gain many insights about Jordanian and Kuwaiti political beliefs from the public opinion surveys and interviews from 2005 to 2007 that the author interprets.”

Reforming the European Union
Realizing the Impossible
Daniel Finke, Thomas König, Sven-Oliver Proksch & George Tsebelis

“European Union treaties set the power relationships among actors and establish the standards that the Union will enjoy in the future, so their design is as important as many of the world’s constitutions. This book convincingly describes and explains how the Treaty of Lisbon came into force despite what seemed at the time like an endless series of negotiations, perceived dead ends, and failed referenda. It is easily the best book on the making of Europe—and European treaties—in quite a long time.”

Child Migration and Human Rights in a Global Age
Jacqueline Bhabha

“This is an important book on a much neglected subject. Not only is the massive problem of involuntary child migration in our chaotic world greatly underappreciated, but also the gigantic policy challenges involved are often wrongly perceived and widely misunderstood. We have reason to be grateful to Jacqueline Bhabha for bringing this powerfully informed, clear-headed analysis to a global problem of extreme urgency.”

Enigmas of Identity
Peter Brooks

"An extremely provocative exploration of the myriad complexities of the act of investigating identity, both as a conceptual category and as a lived and perceived phenomenon. I found especially useful Brooks's emphasis on a crucial paradox: one identity does the investigating while the other is investigated, and yet both are ostensibly part of the same entity."
