Still a House Divided
Race and Politics in Obama’s America
Desmond S. King & Rogers M. Smith

“Still a House Divided deftly lays to rest the idea of postracialism in American politics and, through the concept of rival racial-policy coalitions, reveals the modern potency of the dispute between color-blind and race-conscious camps. King and Smith make a compelling case that competing visions over the role of race continue to define the core of American political life, and their bold and meticulously researched book offers new and much-needed leverage on a frustratingly durable problem.”
—Lawrence D. Bobo, Harvard University

Presenting a powerful account of American political alliances and their contending racial agendas, Still a House Divided sheds light on a policy path vital to the country’s future.

**The Darwin Economy**
Liberty, Competition, and the Common Good
Robert H. Frank

“The Darwin Economy debunks popular nostrums of both left and right, and takes particular aim at the notion that a well-functioning competitive market system will necessarily produce socially optimal results. Frank suggests novel approaches to America’s problems that go well beyond the tired ideas of the present debate.”

Untangling the Ethics of Incentives
Ruth W. Grant

“This remarkable book asks some deceptively simple questions: With what norms should we judge the use of incentives? How can we compare incentives to coercion and persuasion? With characteristically lucid prose and a productive blend of theory and case studies, Ruth Grant illuminates an often-neglected arena of inquiry. At a time when philosophers advocate ‘libertarian paternalism’ as an alternative to coercion and governments deploy ‘conditional cash transfers’ as instruments of social policy, Grant’s reflections could hardly be more relevant.”

Philanthropy in America
A History
Olivier Zunz

“This beautifully crafted book, by master historian Olivier Zunz, transforms our understanding of American civil society. Anyone interested in U.S. politics and society will want to engage with this riveting narrative.”

Ground Wars
Personalized Communication in Political Campaigns
Rasmus Kleis Nielsen

"Nielsen presents a very compelling analysis of an often-neglected aspect of modern presidential campaigns. He challenges the idea that political communication must be tightly controlled and scripted, correctly arguing that personalized, labor-intensive communication prone to individual inflection and enthusiasm represents American democracy in action. Ground Wars is an important and timely book."

The Age of Social Democracy
Norway and Sweden in the Twentieth Century
Francis Sejersted
Translated by Richard Daly with editing by Madeleine B. Adams

“This book will be a treasure trove for scholars—and politicians!—who want to understand the workings of the ‘Scandinavian model.’ Social scientists will value it for the wealth of telling details and compelling counterexamples that can suggest new generalizations and undermine old ones. Historians will appreciate how narrative and analysis acquire depth and relief by the comparison between the intertwined developments of Norway and Sweden, one country now lagging behind and now leaping ahead of its neighbor along economic, political, and cultural dimensions. Politicians will want to understand whether the stable and affluent social democracies rest on unique historical and geographical constellations or offer a model that can be imitated. By virtue of its acute psychological insights and low-key but poignant irony, The Age of Social Democracy is also a marvelously wise book.”

Praise for The Princeton Encyclopedia of American Political History:

“Encyclopedias are both invitations to explore and tools to find particular information. The Princeton Encyclopedia of American Political History amply fulfills both of those functions.” —Choice

With 150 accessible articles written by more than 130 leading experts, this essential reference provides authoritative introductions to some of the most important and talked-about topics in American history and politics, from the founding to today. Abridged from the acclaimed Princeton Encyclopedia of American Political History, this is the only single-volume encyclopedia that provides comprehensive coverage of both the traditional topics of U.S. political history and the broader forces that shape American politics—including economics, religion, social movements, race, class, and gender.

Michael Kazin is professor of history at Georgetown University. Rebecca Edwards is the Eloise Ellery Professor of History at Vassar College. Adam Rothman is associate professor of history at Georgetown University.

Princeton Readings in Religion and Violence
Edited and with introductions by Mark Juergensmeyer & Margo Kitts

“This brilliantly compiled compendium explores the complex relationship between religion and violence. The readings, which span two millennia, force us to confront a painful truth—those who aim to kill in the name of God will find legitimacy in carefully selected sacred texts. Highly recommended for anyone hoping to understand humanity’s persistent attraction to holy war and sacrifice.”
—Jessica Stern, Harvard University

This groundbreaking anthology provides the most comprehensive overview for understanding the fascinating relationship between religion and violence—historically, culturally, and in the contemporary world. Bringing together writings from scholarly and religious traditions, it is the first volume to unite primary sources—justifications for violence from religious texts, theologians, and activists—with invaluable essays by authoritative scholars.

Mark Juergensmeyer is professor of sociology and global studies at the University of California, Santa Barbara. Margo Kitts is associate professor of humanities at Hawai’i Pacific University.

A Dictionary of 20th-Century Communism
Edited by Silvio Pons & Robert Service

“Access to archives in the former Soviet Union and its satellites behind the iron curtain has enabled the 160 scholars who contributed articles to this compendium to present information formerly out of the reach of all but a few in those countries. . . . No other comparable, current source covers twentieth-century communism in similar topical fashion.”
—Booklist

“The new English translation of this work provides readers with a valuable overview of the world communist movement, in 400-plus entries, including not only the history of the Soviet Union, the People’s Republic of China and other communist states, but also of the various communist parties in Europe, the U.S., and the rest of the world. The volume’s strengths lie in its strong coverage of European communism and its willingness to discuss the theoretical and philosophical ideas of its subjects.”
