A Message from the Editors

We are delighted to present the first Princeton WILDGuides catalogue, containing published and forthcoming titles for both the Princeton and WILDGuides lists. The coming years will bring a stream of high-quality natural history books ranging from local British field guides to international references and field manuals.

The 2012 list builds on WILDGuides’ highly acclaimed and popular ‘Britain’s Wildlife’ series with new titles covering sea mammals and hoverflies. *Britain’s Sea Mammals* combines extensive information on identification with details on the best sites to observe the various species. The result is a highly practical field and site guide. *Britain’s Hoverflies* is a groundbreaking book that will enable reliable identification of more than 160 species—those that can be readily identified in the field. *The World’s Rarest Birds* is a stunning presentation of more than 600 of the most threatened species. Each is depicted with superb photos—submitted from photographers around the world—or alluring paintings by Tomasz Cofta. The book contains up-to-the-minute information on each bird’s status and distribution. It will serve as a celebration of some of the most spectacular birds in the world and a sobering reminder of the acute threats that many of them face.

*The Unfeathered Bird* is artist and bird curator Katrina van Grouw’s remarkable take on bird anatomy. The book shows the wide range of evolutionary adaptations of bird species through meticulous, beautiful studies of skeletons and musculature for some 200 species. Most are caught in lifelike positions—fishing, plucking prey, swimming, and so forth. There simply isn’t another book that combines art and natural history in this way. We are also launching a new series for Princeton WILDGuides, ‘Wildlife Explorer Guides’. *Birds of the Masai Mara* and *Animals of the Masai Mara* are designed for any visitor wanting to know more about common and charismatic species. These richly illustrated guides focus on a lot more than basic identification, with insights into behaviour and fuller descriptions of the varied habitats of the Mara.

And, finally, there are two dedicated and complementary guides for South Georgia, *A Field Guide to the Wildlife of South Georgia* and a new edition of *A Visitor’s Guide to South Georgia*. Armed with these, you are guaranteed to make the most of any trip to this extraordinary island.

FORTHCOMING

The World’s Rarest Birds
Erik Hirschfeld, Andy Swash & Robert Still

This illustrated book vividly depicts the most endangered birds in the world and provides the latest information on the threats each species faces and the measures being undertaken to save them. Today, 571 bird species are classified as critically endangered or endangered, and a further four now only exist in captivity. This landmark book features stunning photographs of 500 of these species—the results of a prestigious international photographic competition organized specifically for this book. It also showcases paintings by acclaimed wildlife artist Tomasz Cofa of the 75 species for which no photos are known to exist.

The World’s Rarest Birds has introductory chapters that explain the threats to birds, the ways threat categories are applied, and the distinction between threat and rarity. The book is divided into seven regional sections—Europe and the Middle East; Africa and Madagascar; Asia; Australasia; Oceanic Islands; North America, Central America, and the Caribbean; and South America. Each section includes an illustrated directory to the bird species under threat there, and gives a concise description of distribution, status, population, key threats, and conservation needs. This one-of-a-kind book also provides coverage of data deficient species.

Erik Hirschfeld works in air traffic control management and is a freelance writer, guide, and consultant in ornithology. Andy Swash is a professional ecologist and former environmental adviser to the British government, and runs the photographic agency World Wildlife Images. Rob Still is an ecologist, widely traveled naturalist, and graphic artist who designs books that encourage people to take greater interest in the natural world.
features include

- A unique book that bridges art, science, and history
- Over 300 beautiful drawings, artistically arranged in a sumptuous large-format book
- Accessible, jargon-free text—the only book on bird anatomy aimed at the general reader
- Drawings and text all made with direct reference to actual bird specimens
- Includes most anatomically distinct bird groups
- Many species never illustrated before

FORTHCOMING

The Unfeathered Bird
Katrina van Grouw

There is more to a bird than simply feathers. And just because birds evolved from a single flying ancestor, doesn’t mean they are structurally all the same. With over 300 stunning drawings representing 200 species, The Unfeathered Bird is a richly illustrated book on bird anatomy and offers a refreshingly original insight into what goes on beneath the surface. Each exquisite drawing is made from an actual specimen and reproduced in sumptuous large format. The birds are shown in lifelike positions and engaged in behaviour typical of the species: a fish’s-eye view of a swimming loon skeleton, the musculature of a porpoising penguin, and an unfeathered sparrowhawk plucking its prey. Jargon free and easily accessible to any reader, the lively text relates birds’ anatomy with their lifestyle and evolution, examining such questions as, why penguins are bigger than auks, whether harrier hawks really have double-jointed legs, and the difference between wing claws and wing spurs. A landmark in popular ornithological literature, The Unfeathered Bird is a must for anyone with an appreciation of birds, bird art, or both.

Katrina van Grouw is a former curator of the ornithological collections at London’s Natural History Museum, a taxidermist, experienced bird bander, successful fine artist, and a graduate of the Royal College of Art.

December 2012. 304 pages. 201 duotones/colour illus. 11 x 12.

Britain’s Hoverflies
An Introduction to the Hoverflies of Britain and Ireland
Stuart Ball & Roger Morris

Britain’s Hoverflies is a beautifully illustrated photographic field guide to all the genera of hoverflies found in Britain, focusing on the species most likely to be identified. Accessible and designed to appeal to a wide audience, the book contains more than 500 remarkable photographs exploring the various life stages of all 69 hoverfly genera and 164 species. Easy to use species accounts highlight key identification features, including status, behaviour, and habitat requirements. The book also contains distribution maps, phenology charts, and introductory chapters that examine hoverfly biology. This guide is the perfect companion for wildlife enthusiasts, professional ecologists, and anyone with an interest in this unique insect family.

Since 1991, Stuart Ball and Roger Morris have jointly run the Hoverfly Recording Scheme. They are active members of the Dipterists Forum.

October 2012. 240 pages. 500 colour photos. distribution maps. 6 x 8. Pa: 978-0-691-15659-0 £24.95 | $35.00

features include

• More than 500 remarkable photographs depict all 69 hoverfly genera and the 164 species in Britain that can be identified by eye or with a magnifying glass
• Introductory chapters explore hoverfly biology
• Species accounts highlight key features of each genus and species, including status, behaviour, and habitat
• Maps and phenology charts examine hoverfly distribution
• A complete list of the 281 hoverfly species recorded in Britain to date with degrees of identification difficulty
Britain’s Sea Mammals
Whales, Dolphins, Porpoises and Seals and Where to Find Them
Jon Dunn, Robert Still & Hugh Harrop

Britain’s Sea Mammals is the essential field guide to all the sea mammals—whales, dolphins, porpoises, and seals—found in coastal Britain. The book features more than 100 stunning photographs and close to 40 detailed and beautiful illustrations of 34 species of sea mammals, paying special attention to the 14 species most readily seen and most likely to be encountered. Factoring in behaviour and locations, introductory chapters look at sea mammal biology and ecology, and how, when, and where these creatures can be spotted. Species accounts highlight key identification characteristics and include information on status, habitat requirements, and distribution. Handy and informative, Britain’s Sea Mammals is the ideal guide to sea mammal watching in the United Kingdom.

Jon Dunn lives in Shetland, UK, working there and abroad as a wildlife tour guide and writer. Robert Still is the publishing director and chief designer of WILDGuides—a publishing company specializing in field guides that help raise funds for conservation. Hugh Harrop founded the award-winning ecotourism business Shetland Wildlife in 1992.

features include
• The only guide that focuses on the 34 species of sea mammal recorded in Britain, particularly the 14 most readily seen species in the country
• More than 100 photos and almost 40 illustrations highlight species, their behaviour, and locations
• Introductory chapters explore how, when, and where to look for sea mammals
• Species accounts highlight key identification features, including information on status, habitat requirements, and distribution
NEW

Antarctic Wildlife
A Visitor’s Guide
James Lowen

Antarctic Wildlife is the definitive identification guide to the birds and marine mammals of the Antarctic Peninsula, Drake Passage, and Beagle Channel. This easy-to-use photographic field guide enables visitors to this unique region of the world—newcomer and seasoned traveller alike—to identify with confidence the penguins, whales, seals, seabirds, and other stunning wildlife they encounter on their journey. Full-colour photographs show typical views of each species of bird or marine mammal, together with the terrestrial plants likely to be seen. Detailed species accounts describe key identification features, give tips on where to look, and highlight interesting facts. This one-of-a-kind guide also includes introductory chapters that cover the wildlife of each Antarctic environment by season, as well as information on tourism and Antarctic cruising that will help visitors get the most from their trip.

Antarctic Wildlife is a must-have photographic guide for travelers taking the standard cruise from Ushuaia, Argentina, to the great white continent, and for anyone interested in the diverse wildlife found in this remote part of the world.

James Lowen is a wildlife writer, photographer, and lecturer. An Antarctic naturalist guide for Polar Star Expeditions, he lived in Argentina for a number of years before moving back to the United Kingdom.

2011. 240 pages. 159 colour photos. 6 x 8.
Pa: 978-1-903-65732-4 £17.95 | $22.95

features include

• Covers the wildlife of the Antarctic Peninsula, Drake Passage, and Beagle Channel
• Features full-colour photographs throughout
• Describes key identification features and gives tips on where to look
• Includes an introduction to Antarctic environments and information on Antarctic cruising
Birds of the Masai Mara
Adam Scott Kennedy

*Birds of the Masai Mara* is a remarkably beautiful photographic guide featuring the bird species likely to be encountered by visitors to the popular Masai Mara National Reserve in Kenya. With an eye-catching layout, easy-to-use format, and no-jargon approach, the book contains more than 300 stunning photographs covering over 200 species of birds and is accessible and informative, rather than purely identification-based. A handy, brief introduction provides visitors background on the habitats of the national park and the guide’s habitat-based approach makes it simple to identify any bird species according to where it is found. Based on the first-hand experiences of the author, *Birds of the Masai Mara* is an ideal companion to all those visiting the national reserve and to bird aficionados interested in learning more about the region.

Adam Scott Kennedy has served as principal leader on birding holidays within South America, Africa, Europe, and New Zealand. With his wife Vicki, he currently operates as a private safari guide, specializing in photographic and wildlife safaris. Information on their tours and stock image library can be found at www.rawnaturephoto.com.

**features include**

- The only photographic guide to focus solely on the bird species of the Masai Mara National Reserve
- More than 300 remarkable photographs covering more than 200 species
- Accessible text explores bird species behaviour and species etymology
- A brief and handy introduction examines the habitats of the Masai Mara
- Easy-to-use habitat based layout makes exciting birdwatching easy
ForTHCOMING

Animals of the Masai Mara
Adam Scott Kennedy & Vicki Kennedy

One of the greatest attractions of a trip to Kenya is the chance to see animals such as lions, cheetah, leopards, zebra, and giraffe up close and in their natural habitats. Animals of the Masai Mara is a lavish photographic guide exploring the charismatic wildlife most likely to be encountered by a safari visitor to the Masai Mara National Reserve in southwest Kenya. More than 140 stunning photographs showcase 65 mammals and 17 reptile species, including 6 snakes. Designed to be informative and locally accurate, rather than purely identification-based, this easy-to-use book pays particular attention to wildlife behaviour and is written based on the first-hand experiences of the authors and the knowledge of local safari guides. Numerous "Top Tips" throughout show readers how and where to locate specific species. The only field guide to focus solely on the wildlife of the Masai Mara National Reserve, Animals of the Masai Mara will be indispensable to visitors to this famous park and all nature enthusiasts with an interest in this area of the world.

Since 2008, Adam Scott Kennedy and Vicki Kennedy have managed remote luxury safari camps in Tanzania and Kenya and now operate as private safari guides, specializing in photographic and wildlife safaris. Information on their tours and stock image library can be found at www.rawnaturephoto.com.

features include

• The only photographic guide specific to the animals of the Masai Mara National Reserve

• More than 140 remarkable photographs covering 65 mammals and 17 reptile species, including 6 snakes

• Accessible text explores animal behaviour and other interesting facts

• A brief and informative introduction to the habitats of the Masai Mara
FORTHCOMING

A Field Guide to the Wildlife of South Georgia
Robert Burton & John Croxall

South Georgia is rich in wildlife and spectacular scenery, and it is a prime destination spot on most Antarctic tours. This beautifully illustrated field guide depicts the birds, mammals, insects, flowering plants, and other vegetation found in this unique part of the world. It features 368 full-colour photographs of more than 180 species, including 65 species of birds, 20 species of sea mammals, nearly 60 species of insects, and more than 40 species of flowering and nonflowering plants. Detailed species accounts describe key identification features, with information on status, behaviour, threats, and distribution. This one-of-a-kind photographic guide also includes introductory chapters on South Georgia’s geography, climate, ecology, and conservation.

Robert Burton is a natural history writer and Antarctic tour lecturer. He first visited South Georgia in 1964 and later worked on albatrosses at the British Antarctic Survey research station at Bird Island. John Croxall worked for thirty years on seabirds and seals at South Georgia for the British Antarctic Survey, retiring in 2006. He is a fellow of the Royal Society and a trustee of the South Georgia Heritage Trust.

July 2012. 200 pages. 368 colour illus. 6 x 8.
Pa: 978-0-691-15661-3 £17.95 | $24.95

Not for sale in South Georgia and the Falkland Islands
A Visitor’s Guide to South Georgia
Sally Poncet & Kim Crosbie

A Visitor’s Guide to South Georgia features hundreds of colour photographs of the diverse wildlife and breathtaking scenery to be found at this unique tourist destination. It includes extensive and up-to-date coverage of all wildlife groups—from albatrosses and petrels to seals and penguins—as well as colour maps and detailed information for the 23 key visitor sites. This stunning photographic guide describes the history, geology, and culture of South Georgia. It also provides a checklist of all fauna and flora as well as valuable tips for visitors to the islands, and the book’s wirebound format enables it to fold out flat for easy use in a water-protective holder.

Sally Poncet conducts research on seabirds, invasive species, and habitat restoration in the Falkland Islands and South Georgia. Kim Crosbie is a freelance naturalist, guide, and writer.

features include

• Features hundreds of photos
• Covers all wildlife groups
• Includes maps and information for the 23 key visitor sites
• Describes South Georgia’s unique history, geology, and culture
• Provides a checklist of all fauna and flora
• Gives valuable tips for visitors

Fully Updated Second Edition
Whales and Dolphins of the European Atlantic
The Bay of Biscay, English Channel, Celtic Sea, and Coastal Southwest Ireland
Dylan Walker & Graeme Cresswell

Fully updated, with new images, revised artwork, and the latest distribution data, this comprehensive photographic guide to whales, dolphins, and porpoises now covers coastal southwest Ireland and the Celtic Sea as well as the English Channel and the Bay of Biscay. Designed for easy use at sea or when watching from land, it covers all 18 regularly seen species and the 13 rarities that have also been recorded. It includes details of status and behaviour, as well as introductory sections to help you get the most from your whale watching in the region.

“[T]his is a very useful book…. It will definitely accompany me on my next sea-trip.”
—Mammal Society
This book has been produced with the aim of stimulating the general naturalist to take a closer look at the bumps and lumps that make up the fascinating world of plant galls. Induced by a variety of insects and other organisms and ranging from tiny pimples to bizarre and often very attractive and exquisitely sculptured growths, plant galls are a mystery to many people, but they offer a fascinating field of study for both botanists and zoologists. Galls can be found on a very wide range of both woody and herbaceous plants, with over 50 different kinds occurring on Britain’s oak trees alone, and there is still much to be learned about even the commonest examples.

Michael Chinery is best known for his field guides to insects and other creepy-crawlies, especially those that occur in gardens. He joined the British Plant Gall Society soon after its formation in 1985, and has been editing the Society’s journal, Cecidology, since 1990.

2011. 96 pages. 252 colour photos. 2 line illus. 6 x 8 ½. Pa: 978-1-903-65743-0 £14.95 | $21.95

Fully Revised and Updated Second Edition

Britain’s Butterflies
A Field Guide to the Butterflies of Britain and Ireland
David Newland & Robert Still
David Tomlinson & Andy Swash

“Undoubtedly this book is one of the best and could be used to help one find and then identify Britain’s butterflies with confidence.”
—Nick Bowles, Atropos

This is a comprehensive photographic field guide to the butterflies of Britain and Ireland. The innovative, easy-to-use format aims to help the butterfly-watcher—beginner or expert—to identify any species they encounter.

2010. 224 pages. 558 colour photos. 10 line illus.
75 maps. 6 x 8 ½.
Pa: 978-1-903-65730-0 £17.95 | $25.95

Britain’s Orchids
David Lang

“The information included in the book is extremely well thought-out … the author has done a great job in helping the novice get to grips with the whole subject of orchids right through to giving the more experienced botanist a thoroughly useable guide.”
—CharlesBirdBlog

Featuring 60 superb colour plates, this is an easy-to-use photographic identification guide to the 51 orchid species native to Britain and Ireland, including their various forms, and 9 species of uncertain provenance.

2004. 192 pages. 60 colour plates. 6 x 8 ½.

- Features detailed species accounts that describe flight, plumage, distribution, and more
- Provides overviews of ocean habitats, taxonomy, and conservation
- Offers tips on how to observe and identify birds at sea

NEW

Petrels, Albatrosses, and Storm-Petrels of North America
A Photographic Guide
Steve N. G. Howell

“No other text on the tubenoses begins to offer the material contained in Howell’s latest book. The reader has a palpable sense, when reading it, that the author not only knows his subject and audience but also genuinely loves the ocean and its inhabitants—and relishes teaching people about them.”—Edward S. Brinkley, author of National Wildlife Federation Field Guide to Birds of North America

Petrels, albatrosses, and storm-petrels are among the most beautiful yet least known of all the world’s birds, living their lives at sea far from the sight of most people. Largely coloured in shades of gray, black, and white, these enigmatic and fast-flying seabirds can be hard to differentiate, particularly from a moving boat. Useful worldwide, not just in North America, this photographic guide is based on unrivaled field experience and combines insightful text and hundreds of full-colour images to help you identify these remarkable birds.

The first book of its kind, this guide features an introduction that explains ocean habitats and the latest developments in taxonomy. Detailed species accounts describe key identification features such as flight manner, plumage variation related to age and molt, seasonal occurrence patterns, and migration routes. Species accounts are arranged into groups helpful for field identification, and an overview of unique identification challenges is provided for each group. The guide also includes distribution maps for regularly occurring species as well as a bibliography, glossary, and appendices.

Steve N. G. Howell is an acclaimed field ornithologist and writer. He is an international bird tour leader with WINGS and a research associate at PRBO Conservation Science in California.

2012. 512 pages. 800 colour photos and figs. 66 maps. 7 x 10.
Cl: 978-0-691-14211-1 £30.95 | $45.00

**Orchids and Wildflowers of Kitulo Plateau**
Rosalind F. Salter & Tim R. B. Davenport

This is the first field guide to the orchids and wildflowers of Tanzania’s Kitulo Plateau, which is also known as the “Garden of God” and “Serengeti of Flowers.” This colour-illustrated guide describes a selection of 116 species and will enable anyone who visits Bustani ya Mungu to appreciate it all the more.

Rosalind F. Salter has worked as a researcher and consultant in the Eastern Arc Mountains, Coastal Forests, and Southern Highlands of Tanzania since 2001. In addition to running a small UK-based ecological consultancy, she has ongoing research interests in Kitulo linked to the WCS Southern Highlands Conservation Program. Dr. Tim R. B. Davenport is Country Director of the Wildlife Conservation Society (WCS) in Tanzania, where he has lived since 1999. He has also worked in the UK, Uganda, Cameroon, and Malawi. He initiated the WCS Southern Highlands Conservation Program in 2000 and was instrumental in getting Kitulo gazetted as a national park and the adjacent Mt. Rungwe designated as a Nature Reserve. He was awarded the Parker-Gentry Award for Conservation in 2008, and currently lives in Zanzibar.

features include

- 116 species (including 29 orchids) described and illustrated with colour photographs
- Notes on each species and race, covering identification, habitat, distribution, and rarity
- A concise description of the national park and its unique flora and fauna
- An introduction to the main habitats of the plateau
- An illustrated botanical glossary to aid identification

Arable Plants
A Field Guide
Phil Wilson & Miles King
This book concentrates on the group of plants showing the steepest decline among British flora over the past 25 years—plants that grow among the crops.

• Easy-to-use format is designed to enable people to take it into the field and to identify these species whether they are a beginner or an expert
• 100 plant profiles include key identification features, flowering and germination times, and differences between similar species

Wildlife of Seychelles
John Bowler
“[T]his book is undoubtedly a valuable addition to Seychelles guides, allowing visitors to gain a greater appreciation of the uniqueness of Seychelles’ fauna but, more importantly, encouraging the Seychellois to learn about and value their heritage.”
—Chris Feare, Joint Nature Conservation Committee
This is an indispensable guide to the wildlife of Seychelles, covering the birds, mammals, reptiles, amphibians, and invertebrates most likely to be encountered. It features 64 superb colour photographic plates, and highlights the many species and subspecies unique to these islands.

Arable Bryophytes
A Field Guide to the Mosses, Liverworts, and Hornworts of Cultivated Land in Britain and Ireland
Ron Porley
This book has been produced to highlight the conservation importance of the mosses, liverworts, and hornworts that are found on cultivated land. These plants may be tiny and unobtrusive, but close examination reveals their true beauty. The stunning photographs will surely inspire an increased level of interest in this relatively little-known group and enable even the novice bryologist to gain a better insight into the rich diversity of our bryophyte flora.

Wildlife of the Falkland Islands
Robin Woods & Anne Woods
With over 100 photographs by Alan R. Henry
“[T]he wildlife guide of choice for those planning to visit the Falkland Islands…. Highly recommended!”
—Chris Sharpe
This is an authoritative photographic guide to the birds and land and marine mammals most likely to be encountered in the Falkland Islands, featuring 43 stunning colour plates and a complete checklist of the birds.
Trees of Panama and Costa Rica
Richard Condit, Rolando Pérez & Nefertaris Daguerre

“This is a wonderful book for visitors to the region who want to try to know the trees that grow there. It is also a major, important work for biologists, ecologists, and students working in these two beautiful countries.”
—Dan Kunkle, Wildlife Activist

“Trees of Panama and Costa Rica includes superb colour photos, abundant colour distribution maps, and concise descriptions of key characteristics, making this guide readily accessible to botanists, biologists, and casual nature lovers alike.”
—Ian Paulsen, Birdbooker Report

Endemic Plants of the Altai Mountain Country

“[I]llustrated with stunning photographs of habitats and plants—many of the species being photographed for the first time.”
—Cuttings

Under its Living Planet Campaign, the World Wildlife Fund has identified 200 of the Earth’s most biologically outstanding habitats. One of these is the Altai-Sayan Montane Forests Ecoregion, an extraordinary mosaic of coniferous forests, intermontane steppe, and alpine meadows that lies on the borders of Russia, Mongolia, Kazakhstan, and China, and where half the flora of Siberia can be found. The team of authors responsible for producing this remarkable book has surveyed more than 300 endemic plants, many of which are important for medicine or food, to plug a gap in the knowledge of a poorly studied region. The book contains the first photographs published of many of the species and is a testament to international scientific collaboration.

2008. 368 pages. 100 colour plates. 6 x 8 ½.
Cl: 978-1-903-65722-5 £29.95 | $43.95

How to Be a Better Birder
Derek Lovitch

“This book is useful for those wanting a convenient introduction to birding as it is currently practiced by many of the leaders in the North American field. The writing is informative and conversational, a good balance to strike when trying to make more advanced birding techniques accessible to a broader audience.”—Jeffrey A. Gordon, president of the American Birding Association

This unique illustrated handbook provides all the essential tools you need to become a better birder. Here Derek Lovitch offers a more effective way to go about identification—he calls it the “Whole Bird and More” approach—that will enable you to identify more birds, more quickly, more of the time. He demonstrates how to use geography and an understanding of habitats, ecology, and even the weather to enrich your birding experience and help you find something out of the ordinary. Lovitch shows how to track nocturnal migrants using radar, collect data for bird conservation, discover exciting rarities, develop patch lists—and much more.

This is the ideal resource for intermediate and advanced birders. Whether you want to build a bigger list or simply learn more about birds, How to Be a Better Birder will take your birding skills to the next level.

Derek Lovitch has worked on avian research and education projects throughout the United States, has written numerous articles for birding publications, and was a columnist for Birding magazine. He now owns and runs Freeport Wild Bird Supply in Maine.

May 2012. 208 pages. 53 colour illus. 10 maps. 6 x 9.
F: 978-0-691-14448-1 £13.95 | $19.95

features include

• Explains the “Whole Bird and More” approach to bird identification
• Demonstrates how to use geography, habitats, ecology, and the weather to be a better birder
• Shows how to bird at night using radar, collect conservation data, develop patch lists—and more
• Offers essential tools for intermediate and advanced birders

**Dragonflies and Damselflies of the East**
Dennis Paulson

“*Dragonflies and Damselflies of the East* is superbly organized, concisely written, and beautifully illustrated. It combines the strengths of a field guide with the invaluable technical information of a manual. As such, the reader will have a strong tool in his or her possession. There really is no other book like it.”

—Allen E. Barlow, senior author of *Field Guide to Dragonflies and Damselflies of New Jersey*

This is the first fully illustrated guide to all 336 dragonfly and damselfly species of eastern North America—from the rivers of Manitoba to the Florida cypress swamps—and the companion volume to Dennis Paulson’s acclaimed field guide to the dragonflies and damselflies of the West. *Dragonflies and Damselflies of the East* features hundreds of colour photos that depict all the species found in the region, detailed line drawings to aid in-hand identification, and a colour distribution map for every species—and the book’s compact size and user-friendly design make it the only guide you need in the field. Paulson’s authoritative introduction offers a primer on dragonfly biology and identification, and also includes tips on how to study and photograph these stunningly beautiful insects.

Dennis Paulson, now retired, was director of the Slater Museum of Natural History at the University of Puget Sound.

Princeton Field Guides
2011. 544 pages. 675 colour photos. 350 line illus. 333 maps. 5 ½ x 8 ½.

**Also by Dennis Paulson**
Honorable Mention, 2009 National Outdoor Book Award, Nature Guidebook Category

**Dragonflies and Damselflies of the West**

“Who knew that there were 348 species of dragonflies and damselflies in the Western United States? That fact alone should make nature lovers who enjoy traveling to wild places want to check out Dennis Paulson’s new book, *Dragonflies and Damselflies of the West*. . . . This guide includes information on flight seasons, habitat and natural history in the description of each insect as well as helpful tips on how to observe and photograph them.”

—*Salt Lake Tribune*

Princeton Field Guides
2009. 536 pages. 863 colour photographs. 392 line illus. 12 tables. 348 maps. 5 ½ x 8 ½.
Pa: 978-0-691-12281-6  £19.95 | $29.95
Cl: 978-0-691-12280-9  £48.95 | $70.00

**features include**

- Illustrates all 336 eastern species
- Features hundreds of full-colour photos
- Includes detailed species accounts, line drawings to aid identification, and a colour distribution map for every species
- Offers helpful tips for the dragonfly enthusiast
Whales and Dolphins of the North American Pacific
Including Seals and Other Marine Mammals
Graeme Cresswell, Dylan Walker & Todd Pusser

“This is a book you can use over and over again…. It was researched by passionate experts, photographed by gifted artists, and organised by a mastermind…. [I]ndispensable.”
—Catherin Dook, Boat Journal

“A wonderful selection of colour photos of the ever-interesting sea mammals. It’s a quick identification manual that all our tourist whale watchers should have. A great chance to look at the creatures that abound in our local waters.”
—Ron Maclsaac, Lower Island News

This is the first comprehensive photographic guide to the marine mammals of the North American Pacific (from Baja California in Mexico to southeast Alaska), featuring stunning colour photographs of all 39 species of whales, dolphins, and porpoises, as well as 6 species of seals and sea lions, and the sea otter.

Not for sale in North America

Winner of the 2011 PROSE Award for Excellence in Reference Works, Association of American Publishers

The Crossley ID Guide
Eastern Birds
Richard Crossley

“What’s so different about the Crossley ID Guide? Everything. Crossley has designed his guide to reflect the way we see and identify birds. We identify birds by their size, shape, structure, behaviour, habitat, and field marks. We [see] birds at close range, at middle and long distances, on the ground, in flight, in trees, and on the water…. If you want to be a better birder you will find the new Crossley ID Guide to be [a] major innovation and a valuable tool.”
—Wayne Mones, Audubon.org

“Believe the hype! The plates are incredible…. [People] will absolutely love it, especially people new to birding—the main part of the book’s target audience…. For me some of the plates were good enough to stick on the wall in a frame as a work of art…. I salute Richard Crossley’s bravery. I think it’s a brilliant, innovative idea and everyone should get a copy.”
—Urban Birder

2011. 528 pages. 10,000 colour images. 7 ½ x 10. Cl: 978-0-691-14778-9 £24.95 | $35.00

Read newsworthy and lively commentary on our new blog at press.princeton.edu/blog
Winner of the 2006 National Outdoor Book Award, Best Nature Guidebook

**Caterpillars of Eastern North America**
A Guide to Identification and Natural History
David L. Wagner

“This book adds to our understanding of caterpillars by providing a means to identify common caterpillars via excellent photos of early stages that are associated with photos of adults, and through snippets of natural history text for each species. This alone will generate enthusiasm for caterpillars among professional biologists and general readers interested in lepidoptera.”
—Philip J. DeVries, author of *Butterflies of Costa Rica and Their Natural History, Volumes I and II*

**Princeton Field Guides**
2005. 512 pages. 850 colour photos. 12 line illus. 5 x 8.
Pa: 978-0-691-12144-4 £19.95 | $29.95

With a foreword by Pete Dunne

**Hawks at a Distance**
Identification of Migrant Raptors
Jerry Liguori

“Hawks at a Distance offers bird watchers of all experience levels the opportunity to learn a skill that has long been considered a prized specialty. Extensive colour photographs supplemented with black-and-white illustrated shape charts depict the various raptors commonly found in the U.S. and Canada in a host of flight positions. By presenting these with detailed descriptions of flight patterns and aerial habits, Liguori has created what is quite likely the definitive book on the subject presently in print.”
—John Riutta, *Bird Watcher’s Digest*

2011. 216 pages. 558 colour photos. 19 half tones. 2 tables. 6 x 8 ½.
Pa: 978-0-691-13559-5 £13.95 | $19.95
Cl: 978-0-691-13558-8 £34.95 | $49.50

With a foreword by David A. Sibley

**Hawks from Every Angle**
How to Identify Raptors In Flight
Jerry Liguori

“Hawks from Every Angle is a major advance in our knowledge of identifying raptors in flight and as such needs to be in the library (and field pack) of every serious raptor biologist, hawk watcher, and birder going afield in North America.”
—Donald S. Heintzelman, *International Hawk-watcher*

“For anyone who yearns to become expert at watching hawks in nature, this guide is the one to buy.”
—*Biology Digest*

2005. 144 pages. 339 colour photos. 32 b/w photos. 2 maps. 7 ½ x 9 ½.
Pa: 978-0-691-11825-3 £13.95 | $19.95
Cl: 978-0-691-11824-6 £34.95 | $49.50

North American guides • 19
Second Edition

Mammals of North America
Roland W. Kays & Don E. Wilson

“This is a truly indispensable guide for the experienced mammal watcher as well as a real treat to the novice…. With 112 colour plates covering 462 species of North American mammals, the guide is up-to-date, accurate, handsome and handy. If you only have one reference to your local furry friends, be sure this one is on your bookshelf.”
—Cathy Taibbi, Wildlife Conservation Examiner, Examiner.com

“This is a perfect guide for naturalists of all ages and skill levels…. [A] wonderfully compact and easy to use field guide.”
—Birdfreak.com

Birds of Western North America
A Photographic Guide
Paul Sterry & Brian E. Small

“Of all the various field guides I have ever seen, these … are by far the best.”
—James Swan, ESPNOutdoors.com

“Stunning. This was the first word that came to mind upon cracking open these new guides…. The photography alone is worth owning both Eastern and Western editions. Even so, the accompanying text is fantastic too.”
—Eddie Callaway, Birdfreak.com

2009. 416 pages. 1,341 colour photos. 449 maps. 5 ½ x 8.
Pa: 978-0-691-13428-4 £12.95 | $18.95
Cl: 978-0-691-13427-7 £32.95 | $46.95

Birds of Eastern North America
A Photographic Guide
Paul Sterry & Brian E. Small

“Brian Small and co-author Paul Sterry have taken the photo-based field guide to a new level. Their new books are beautifully designed and well written. Photos are tack-sharp, and tightly cropped, giving close-up views of each bird.”
—Matt Mendenhall, Birder’s World

“Exceptionally well done. Double-page layouts of text and maps on the left and digitally enhanced photos of the matching birds on the right make these guides easy to use in the field.”
—John Riutta, Bird Watcher’s Digest

2009. 416 pages. 1,341 colour photos. 449 maps. 5 ½ x 8.
Pa: 978-0-691-13428-4 £12.95 | $18.95
Cl: 978-0-691-13427-7 £32.95 | $46.95

Mammals of North America APP
Roland W. Kays & Don E. Wilson

The best-selling Princeton field guide to the land and marine mammals of the United States and Canada is now available in digital form on the App Store and Android Market.
NEW PAPERBACK

Birdscapes
Birds in Our Imagination and Experience
Jeremy Mynott

“An absolutely fascinating book, exhaustively researched, beautifully written, both learned and humorous, and endlessly stimulating.”
—Bryan Bland, Birding World

Birdscapes is a unique meditation on the variety of human responses to birds, from antiquity to today, and from casual observers to the globe-trotting “twitchers” who sometimes risk life, limb, and marriages simply to add new species to their “life lists.” Drawing extensively on literature, history, philosophy, and science, Jeremy Mynott puts his own experiences as a birdwatcher in a rich cultural context. Conversational, playful, and witty, Birdscapes gently leads us to reflect on large questions about our relation to birds and the natural world.

Jeremy Mynott has been watching, listening to, and thinking about birds—and birders—for much of his life. He is the former chief executive of Cambridge University Press and is a fellow of Wolfson College, Cambridge.

2012. 392 pages. 8 colour illus. 32 halftones. 25 line illus. 6 x 9.
Pa: 978-0-691-15428-2 £13.95 | $19.95
Cl: 978-0-691-13539-7 £19.95 | $29.95

“The finest book ever written about why we watch birds…. Mynott’s lightness of touch, combined with his depth of knowledge, experience and above all perception, create a thought-provoking and compulsively readable book.”
—Stephen Moss, Guardian

The Jewel Hunter
Chris Gooddie

“A highly entertaining read.”
—Jeremy Brock, Scottish Birds

A tale of one man’s obsession with rainforest jewels, this is the story of an impossible dream: a quest to see every one of the world’s most elusive avian gems—a group of birds known as pittas—in a single year.

Insightful, compelling, and laugh-out-loud funny, this is more than a book about birds. It’s a true story detailing the lengths to which a man will go to escape his midlife crisis. A travelogue with a difference, it follows a journey from the suburban straitjacket of High Wycombe to the steamy, leech-infested rainforests of remotest Asia, Africa, and Australia.

Dangerous situations, personal traumas, and logistical nightmares threaten The Jewel Hunter’s progress. Will venomous snakes or razor-clawed bears intervene? Or will running out of fuel mid-Pacific ultimately sink the mission? The race is on….

If you’ve ever yearned to escape your day job, wondered what makes men tick, or simply puzzled over how to make a truly world-class cup of tea, this is a book for you.

2010. 350 pages. 137 colour illus. 19 maps. 6 x 9. Pa: 978-1-90365716-4 £17.95 | $25.95

Honeybee Democracy
Thomas D. Seeley

“Splendid.”
—John Whitfield, Nature

“Dr. Seeley is an engaging guide. His enthusiasm and admiration for honeybees is infectious. His accumulated research seems truly masterly, doing for bees what E. O. Wilson did for ants.”
—Katherine Bouton, New York Times

“Engaging and fascinating…. Seeley writes with infectious enthusiasm…. Honeybee Democracy offers wonderful testament to his career of careful investigation of a remarkable natural phenomenon. The breadth and depth of the studies reported in it should inspire all students of animal behaviour.”
—Science

An impressive exploration of animal behaviour, Honeybee Democracy shows that decision-making groups, whether honeybee or human, can be smarter than even the smartest individuals in them.

2010. 280 pages. 30 colour illus. 30 halftones. 26 line illus. 1 table. 8 x 9. Cl: 978-0-691-14721-5 £19.95 | $29.95

Nightjars, Potoos, Frogmouths, Oilbird, and Owlet-nightjars of the World
Nigel Cleere

“If you aren’t already a fan of nightjars, this book will convert you.”
—Grant McCreary, Birder’s Library

“This is a sumptuous volume which has brought together the best-ever collection of photographs of nightjars and their allies. Some of the images have to be seen to be believed, they are so brilliant.”
—John Clark, Birding World

“A must have for those with any interest in nightjars!”
—Ian Paulsen, Birdbooker Report

2010. 464 pages. 580+ colour photos. 135 colour maps. 7 x 10.
Cl: 978-1-903-65707-2 £34.95 | $45.00

Below Freezing
The Antarctic Dive Guide
Lisa Eareckson Trotter

Below Freezing is the first and only dive guide to the Antarctic. Detailing 27 dive sites on the Antarctic Peninsula and South Georgia with maps, photographs, and descriptions, this guide is packed with information and features vivid colour photographs of the strange marine life of these waters, which remain at a temperature of minus 1 degree C throughout the year. Including sections of underwater photography, the history of Antarctic diving, how to choose and prepare for travel to this remote region, and diving techniques for subzero waters, this book is an indispensable resource for anyone considering diving the seventh continent, and an exciting read for anyone interested in this little-explored underwater world.

2008. 128 pages. 131 colour photos. 4 halftones. 27 maps. 6 x 8 ½.
Pa: 978-1-903-65728-7 £19.95 | $29.95

Birds in a Village
A Century On
W. H. Hudson & Brian Clews

“Brian Clews’ Birds in a Village: A Century On illustrates beautifully how changes in farming practice and domestic activities can drastically alter the balance of nature.”
—Andy Gorman

This fascinating book includes W. H. Hudson’s original 1893 account of the birds found in a village in southeast England and compares the species and populations that occurred then with those that are present today. The striking differences are explored in relation to changes in the countryside during the intervening century and through anecdotes gathered from local residents.

2006. 132 pages. 57 colour and b&w photos. 6 x 9 ½.
Cl: 978-1-903-65715-7 £14.95 | $21.95

**Red Kite Country**

A Celebration of the Wildlife and Landscape of Mid Wales

Mike Read & Colin Woolf

“Containing superb photographs and beautiful watercolour paintings, *Red Kite Country* is a celebration of the wildlife and landscape of Mid Wales.”

—*Wild Countrys*

*Red Kite Country* is a celebration of the wildlife and landscape of Mid Wales. Through their superb photographs and beautiful watercolour paintings, Mike Read and Colin Woolf have captured the essence of this unspoiled area, bringing its many moods and seasons to life in a collection of stunning images. Their aim was to show the reader not only Mid Wales’ large-scale scenic beauty but also the fascinating smaller details that are so often overlooked: this book will open your eyes to the hidden treasures of the Mid Wales countryside.

2004. 130 pages. 160 colour illus. 33 halftones. 10 x 11.
Cl: 978-1-903-65709-6 £24.95 | $35.00

**Flowers of the Forest**

Plants and People in the New Forest National Park

Clive Chatters

“[T]his is a book that deserves to be read by every resident and visitor!”

—*Flora News*

“[N]either botanist nor casual visitor could ask for more.”

—Andrew Brookes, Hants Butterfly Conservation

This book explores the botanical richness and cultural heritage of the New Forest National Park in Hampshire, England. The New Forest has become an exceptional area for wildflowers, many of which were once common throughout the lowlands of Britain.

2009. 248 pages. 300+ colour photos. 7 ½ x 10.
Pa: 978-1-903-65719-5 £24.95 | $35.00

**Discover Butterflies in Britain**

D. E. Newland

“A smashing book, one for all butterfly enthusiasts.”

—*Wild Empire*

“[W]hat a wonderful book it is. With comprehensive details of 66 prime butterfly sites scattered throughout the UK, the author has done a wonderful job of leading the reader through his travels over the years.”

—Peter Eeles

From the Swallowtail to the Small Blue, the largest to the smallest, from the swooping fritillaries to the sedentary hairstreaks, the variety and colour of Britain’s butterflies will astonish you.

2006. 224 pages. Full colour throughout. 7 ½ x 10 ¼.
