

List of Algorithms

1	Accelerated Line Search (ALS)	63
2	Armijo line search for the Rayleigh quotient on S^{n-1}	76
3	Armijo line search for the Rayleigh quotient on $\text{Grass}(p, n)$	86
4	Geometric Newton method for vector fields	112
5	Riemannian Newton method for real-valued functions	113
6	Riemannian Newton method for the Rayleigh quotient on S^{n-1}	119
7	Riemannian Newton method for the Rayleigh quotient on $\text{Grass}(p, n)$	121
8	Riemannian Newton method for the Rayleigh quotient on $\text{Grass}(p, n)$	124
9	Jacobi-Davidson	127
10	Riemannian trust-region (RTR) meta-algorithm	142
11	Truncated CG (tCG) method for the trust-region subproblem	144
12	Truncated CG method for the generalized eigenvalue problem	164
13	Geometric CG method	182
14	Riemannian Gauss-Newton method	186
