

## *Contents*

<b>Preface</b>	<b>ix</b>
<b>1 The Calderón-Zygmund Theory I: Ellipticity</b>	<b>1</b>
1.1 Non-homogeneous kernels	3
1.2 Non-translation invariant operators	19
1.3 Pseudodifferential operators	30
1.4 Elliptic equations	34
1.5 Further reading and references	37
<b>2 The Calderón-Zygmund Theory II: Maximal Hypoellipticity</b>	<b>39</b>
2.1 Vector fields with formal degrees	52
2.2 The Frobenius theorem	53
2.2.1 Scaling techniques	60
2.2.2 Ideas in the proof	65
2.3 Vector fields with formal degrees revisited	71
2.4 Maximal hypoellipticity	73
2.4.1 Subellipticity	75
2.4.2 Scale invariance	84
2.5 Smooth metrics and bump functions	90
2.6 The sub-Laplacian	93
2.7 The algebra of singular integrals	105
2.7.1 More on the cancellation condition	117
2.8 The topology	123
2.9 The maximal function	126
2.10 Non-isotropic Sobolev spaces	128
2.11 Maximal hypoellipticity revisited	139
2.11.1 The Kohn Laplacian	143
2.12 Exponential maps	144
2.13 Nilpotent Lie groups	146
2.14 Pseudodifferential operators	153
2.15 Beyond Hörmander's condition	167
2.15.1 More on the assumptions	169
2.15.2 When the vector fields span	172
2.15.3 When the vector fields do not span	177
2.15.4 A Littlewood-Paley theory	188

2.15.5	The role of real analyticity	193
2.16	Further reading and references	195
<b>3</b>	<b>Multi-parameter Carnot-Carathéodory Geometry</b>	<b>198</b>
3.1	Assumptions on the vector fields	199
3.2	Some preliminary estimates	201
3.3	The maximal function	216
3.4	A Littlewood-Paley theory	219
3.5	Further reading and references	221
<b>4</b>	<b>Multi-parameter Singular Integrals I: Examples</b>	<b>223</b>
4.1	The product theory of singular integrals	223
4.1.1	Non-isotropic Sobolev spaces	232
4.1.2	Further reading and references	238
4.2	Flag kernels on graded groups and beyond	238
4.2.1	Non-isotropic Sobolev spaces	253
4.2.2	Further reading and references	255
4.3	Left and right invariant operators	255
4.3.1	An example of Kohn	261
4.3.2	Further reading and references	262
4.4	Carnot-Carathéodory and Euclidean geometries	263
4.4.1	The $\bar{\partial}$ -Neumann problem	265
4.4.2	Further reading and references	267
<b>5</b>	<b>Multi-parameter Singular Integrals II: General Theory</b>	<b>268</b>
5.1	The main results	269
5.1.1	Non-isotropic Sobolev spaces	273
5.1.2	Multi-parameter pseudodifferential operators	275
5.1.3	Adding parameters	279
5.1.4	Pseudolocality	280
5.2	Schwartz space and product kernels	280
5.3	Pseudodifferential operators and $\mathcal{A}_3 \subseteq \mathcal{A}_4$	293
5.4	Elementary operators and $\mathcal{A}_4 \subseteq \mathcal{A}_3$	302
5.5	$\mathcal{A}_4 \subseteq \mathcal{A}_2 \subseteq \mathcal{A}_1$	308
5.6	$\mathcal{A}_1 \subseteq \mathcal{A}_4$	313
5.7	The topology	327
5.8	Non-isotropic Sobolev spaces	332
5.9	Adding parameters	341
5.10	Pseudolocality	347
5.10.1	Operators on a compact manifold	350
5.11	Examples	351
5.11.1	Euclidean vector fields	351
5.11.2	Hörmander vector fields and other geometries	352
5.11.3	Carnot-Carathéodory and Euclidean geometries	354
5.11.4	An Example of Kohn	356

5.11.5	The product theory of singular integrals	357
5.12	Some generalizations	359
5.13	Closing remarks	361
<b>A</b>	<b>Functional Analysis</b>	<b>363</b>
A.1	Locally convex topological vector spaces	363
A.1.1	Duals and distributions	367
A.2	Tensor Products	370
<b>B</b>	<b>Three Results from Calculus</b>	<b>376</b>
B.1	Exponential of vector fields	376
B.2	The inverse function theorem	377
B.3	A change of variables	378
<b>C</b>	<b>Notation</b>	<b>380</b>
	<b>Bibliography</b>	<b>383</b>
	<b>Index</b>	<b>393</b>
