

## INDEX I

- 1 *Pitane fervens* Walker, 1854 (Erebidae: Arctiinae)
- 2 *Amastus polystrigatus* Dognin, 1901 (Erebidae: Arctiinae)
- 3 *Pseudohyalocerea vulnerata* (Butler, 1875)<sup>1</sup> (Erebidae: Arctiinae)
- 4 *Eumorphia labruscae* (Linnaeus, 1758) (Sphingidae: Macroglossinae)
  - 5 (Geometridae), unidentified
  
- 6 *Idalus perlineosus* (Rothschild, 1917) (Erebidae: Arctiinae)
- 7 *Syngria druidaria* Guenée, 1852 (Uraniidae: Epipleminae)
- 8 *Lophocampa atriceps* (Hampson, 1901) (Erebidae: Arctiinae)
- 9 *Manduca rustica* (Fabricius, 1775) (Sphingidae: Sphinginae)
- 10 *Ctenucha garleppi* Rothschild, 1912 (Erebidae: Arctiinae)
  
- 11 *Eumorphia labruscae* (Linnaeus, 1758) (Sphingidae: Macroglossinae)
  - 12 *Idalus vitreus* (Cramer, 1780) (Erebidae: Arctiinae)
- 13 *Eumorphia labruscae* (Linnaeus, 1758) (Sphingidae: Macroglossinae)
  - 14 *Cosmosoma* sp. (Erebidae: Arctiinae)
  - 15 *Automeris pallidior* Draudt, 1929 (Saturniidae: Hemileucinae)
  
- 16 *Acraga coa* (Schaus, 1892) (Dalceridae: Acraginae)
- 17 *Hydriomena polyphonta* Druce, 1893 (Geometridae: Larentiinae)
  - 18 *Apyre separata* Walker, 1854 (Erebidae: Arctiinae)
  - 19 *Cosmosoma* sp. (Erebidae: Arctiinae)
  - 20 *Emurena tripunctata* (Druce, 1884) (Erebidae: Arctiinae)
- 21 *Psychopasma erosa* (Herrich-Schäffer, [1858])<sup>2</sup> (Erebidae: Arctiinae)
- 22 *Adeloneivaia jason* (Boisduval, 1872) (Saturniidae: Ceratocampinae)
- 23 *Empelathra amplificans* Walker, 1858 (Erebidae: Ophiderinae)
- 24 *Idalus fasciipuncta* Rothschild, 1909 (Erebidae: Arctiinae)
- 25 *Tecmessa dandon* (Druce, 1894) (Notodontidae: Cerurinae)

INDEX I. APRIL, MAY, AND AUGUST 2001, SEVERAL SITES INCLUDING THE CANA MINE SITE, DARIÉN NATIONAL PARK, AND LA FORTUNA STATION, CHIRIQUÍ PROVINCE, PANAMA.

1. Author names in parentheses mean that the species was originally described in a different genus. For example, *Phalaena nitidalis* Cramer was originally described in the genus *Phalaena*, but currently it is in the genus *Diaphania*. So the current name is *Diaphania nitidalis* (Cramer).

2. Dates in square brackets mean that the date of publication of the work where the taxon was described was obtained from indirect sources. For instance, "Guenée, [1858]" indicates that despite the date 1857 appearing on the front page of the publication, it was later discovered, by indirect information (letters to friends, stamps in library stating the date it was received, bills from printers, etc.), that it was really issued in 1858.
