

1987— *The Collected Papers
of Albert Einstein*

(Click here to view our web site descriptions.)

The *Collected Papers of Albert Einstein* is one of the most ambitious publishing ventures ever undertaken in the documentation of the history of science. Selected from among more than 40,000 documents contained in the personal collection of Albert Einstein now housed at the Albert Einstein Archives at Hebrew University, and 15,000 Ein-

stein and Einstein-related documents discovered by the editors since the beginning of the Einstein Project, the *Collected Papers* will provide the first complete picture of a massive written legacy that ranges from Einstein's first work on the special and general theories of relativity and the origins of quantum theory, to expressions of his profound concern with civil liberties, education, Zionism, pacifism, and disarmament.

Every document in the *Collected Papers* appears in its original language, while the introduction, headnotes, footnotes, and other scholarly apparatus are in English. Upon release of each volume, Princeton also publishes an English translation of previously untranslated non-English documents. The series, when complete, will contain more than 14,000 documents and will fill at least twenty-five volumes.

Beyond its editorial complexity, the project has presented unmatched challenges to successive Press directors. First, the Press has been responsible for the funding and management of the editorial office since its inception—a unique arrangement for a large papers project. And although a publishing agreement was signed in 1971 with the executors of the Einstein Estate, many troubles—legal, editorial, and otherwise—ensued, and the first volume did not appear until 1987. The project has been through six different editors.

Nonetheless, the endeavor is now well established, with nine volumes published. Currently located at and supported by the California Institute of Technology, the project proceeds, under the directorship of Diana Buchwald, in its grand effort to bring forth this monumental collection.
