Preface	xi
1	
Number Theory Begins	1
Pierre de Fermat ★	1
Pythagorean Triangles ★	1
Babylonian Mathematics	3
Sexagesimal Numbers	4
Regular Numbers	6
Square Numbers ★	7
Primitive Pythagorean Triples ★	9
Infinite Descent ★	12
Arithmetic Progressions	14
Fibonacci's Approach	17
Problems	19
2	
Euclid	26
Greek Mathematics ★	26
Triangular Numbers ★	27
Tetrahedral and Pyramidal Numbers	29
The Axiomatic Method ★	33
Proof by Contradiction	37
Euclid's Self-Evident Truths ★	38
Unique Factorization	41
Pythagorean Tuning	44
Problems	47
3	
Divisibility	59
The Euclidean Algorithm ★	59
The Greatest Common Divisor ★	61
The Division Algorithm ★	63
Divisibility ★	65
The Fundamental Theorem of Arithmetic	68
Congruences ★	71
Divisibility Tests	74
Continued Fractions	76
Problems	80

4	Diophantus	90
	The <i>Arithmetica</i>	90
	Problems from the <i>Arithmetica</i>	92
	A Note in the Margin ★	94
	Diophantine Equations ★	96
	Pell's Equation	101
	Continued Fractions	103
	Problems	110
5	Fermat	116
	Christmas Day, 1640 ★	116
	Fermat's Little Theorem ★	121
	Primes as Sums of Two Squares ★	126
	Sums of Two Squares ★	129
	Perfect Numbers ★	132
	Mersenne Primes	134
	Fermat Numbers	137
	Binomial Coefficients ★	139
	“Multi Pertransibunt et Augebitur Scientia”	149
	Problems	149
6	Congruences	165
	Fermat's Little Theorem ★	165
	Linear Congruences ★	167
	Inverses ★	170
	The Chinese Remainder Theorem	171
	Wilson's Theorem ★	174
	Two Quadratic Congruences	176
	Lagrange's Theorem	179
	Problems	183
7	Euler and Lagrange	188
	A New Beginning ★	188
	Euler's Phi Function ★	190
	Primitive Roots ★	195
	Euler's Identity ★	199
	Quadratic Residues ★	200
	Lagrange	203
	Lagrange's Four Squares Theorem ★	204
	Sums of Three Squares	207
	Waring's Problem	207
	Fermat's Last Theorem ★	210
	Problems	212

8	Gauss	227
	The Young Gauss	227
	Quadratic Residues ★	229
	The Legendre Symbol ★	231
	Euler's Criterion ★	232
	Gauss's Lemma ★	234
	Euler's Conjecture	238
	The Law of Quadratic Reciprocity ★	239
	Problems	250
9	Primes I	258
	Factoring ★	259
	The Quadratic Sieve Method	261
	Is n Prime? ★	267
	Pseudoprimes ★	269
	Absolute Pseudoprimes	270
	A Probabilistic Test	271
	Can n Divide $2^n - 1$ or $2^n + 1$?	272
	Mersenne Primes ★	273
	Problems	276
10	Primes II	285
	Gaps Both Large and Small ★	285
	The Twin Prime Conjecture ★	286
	The Series $\sum_p \frac{1}{p}$	287
	Bertrand's Postulate	292
	Goldbach's Conjecture ★	296
	Arithmetic Progressions ★	297
	Problems	299
11	Sophie Germain	307
	Monsieur LeBlanc ★	307
	Germain Primes ★	309
	Germain's Grand Plan	312
	Fermat's Last Theorem ★	316
	Problems	317
12	Fibonacci Numbers	324
	Fibonacci ★	325
	The Fibonacci Sequence ★	325
	The Golden Ratio	328
	Fibonacci Numbers in Nature	331

	Binet's Formula ★	334
	Tiling and the Fibonacci Numbers	337
	Fibonacci Numbers and Divisibility	343
	Generating Functions	347
	Problems	349
13	Cryptography	364
	Secret Codes on Mount Everest	365
	Caesar and Vigenère Ciphers ★	366
	Unbreakable Ciphers	368
	Public-Key Systems ★	369
	Problems	374
14	Continued Fractions	379
	The Golden Ratio Revisited	379
	Finite Continued Fractions ★	381
	Infinite Continued Fractions ★	393
	Approximation	402
	Pell's Equation	409
	Problems	424
15	Partitions	433
	Euler ★	434
	Generating Functions	437
	Euler's Pentagonal Number Theorem	440
	Ferrers Graphs	446
	Ramanujan	450
	Problems	457
	Hints for Selected Problems	463
	Solutions to Selected Problems	481
	Brief Introduction to Sage	559
	Suggestions for Further Reading	563
	Pronunciation Guide	569
	Table of Primes	571
	Index	573
